Cecilton	1	5	.167

Cecilton, Md., June 7—Earle Coleman pitched Galena to an easy 9 to2 victory here in the Chesapeake Bay League, holding the home club to four scattered hits, while Jones, Johnson and Frank Coleman fell upon Boulden's offerings.

In the final frame, Jones and Johnson, who had singled, scored on Peacock's double to center and then came home when Coleman beat out a single to right field.

CHURCH HILL STEADY

Kennedyville, Md., June 7—Church Hill maintained its position in the Chesapeake Bay League here by a scant margin when Kennedyville held the Queen Anne's Countians to a 6 to 3 win which was garnered in spite of two circuit clouts made off the veteran Bill Loller by Eagle Archibald and Jones, of the local outfit.

Bodgart, Baltimore flinger and former Washington College moundsman, pitched for Kennedyville.

CAREY HURLS VICTORY

Rock Hall, Md., June 7—Carey, former Washington College moundsman, continued his egorts to land Rock Hall at the top of the Chesapeake Bay League batsmen today and shut out the visitors, who used two flingers in an effort to stop the tide of hits which netted an 11 to 0 victory.

Grant sent a three-bagger to center field in the second frame and came home on an infield error when Fitzgerald hit to second.

Later in the inning Baker, who had singled, scored on J. Williams' sacrifice fly.

CHESTERTOWN AMATEURS BEAT KENNEDYVILLE 10-5

Chestertown, Md., June 7—The local club of the Kent County Amateur League defeated Kennedyville, 10 to 5, after a pitchers' battle between Bennett and Spencer, each allowing 13 hits.

Superior fielding won for the locals.

WEST KENT PREVAILS

Still Pond, Md., June 7—Errors in the sixth inning destroyed Still Pond's hope for a win over West Kent htre in the Kent County Amateur League, the visitors pilling up six runs to win, 8 to 1.

Crew, Sutton, Reinhart, Stauffer, Rasp and R. Williams crossed the plate. Wheat pitched a masterly game for the West Kent club, holding his opponents to two scattered hits. Box score:

Why Covered Bridges

It is stated that the chief purpose of covering bridges was to protect the bridges themselves against the weather, and not to serve as a shelter for travelers. This protection added many years to the life of a wooden bridge, at a time when lumber for the roof and sides was cheap.

Why Airplane Ride Cools

Aside from the motion, there is a second reason which makes an airplane ride cool: For every 1,000 feet ascended there is an actual drop of three degrees in temperature.

Why Lobster Turns Red

A lobster turns red when it is boiled because the result of the effect of boiling water on the coloring material in the shell, and is a chemical change.

Original Speed Law?

The first speed law passed in America was drawn by the board of selectmen of Boston in 1757. The ordinance follows: "Owing to great danger arising oftentimes from coaches, sleighs, chairs and other carriages on the Lord's days, as people are going to or coming from the several churches in this town, being driven with great rapidity, and the public worship being oftentimes much disturbed by such carriages, it is therefore voted and ordered that no coach, sleigh, chair, chaise or other carriage at such times be driven at a greater rate than a foot pace, on penalty to the master of the slave or servant so driving of the sum of ten shillings."

LIVE REPORTERS MAKES GOOD

WES BROOKER, suburban reporter for the Morning Call, found himself entering the public museum when he should have been covering a lecture on child psychology at the Henry Clay school. Instead of dozing in a hard seat in the school auditorium, while Doctor Sylvia Hambrecht, eminent child expert who as yet had not been fortunate enough to have any children herself, droned on about the psychological reactions of the adolescent and illustrated her lectures with fierce though profound glances through large glasses, Wes had chosen to come down to the museum and see the thing for himself. It was a queer coincidence that had brought him and Major Mieding together at the athletic club banquet. Wes always welcomed an opportunity to swap war experiences.

The reporter hustled through the corridor and turned to the right into the main floor museum room. He had been there many times. The Indian basket display, the miniature groups depicting life of the Eskimos, the shelves containing ancient lamps, did not interest him. He entered the large room housing the World war exhibit and walked through the aisles between the cabinets, examining them closely. He stopped before one of the cabinets and stared at an object mounted carefully and bearing a neatly lettered placard.

It was a small silver cross, perhaps an inch and a half long, "lost by some American soldier most likely killed while advancing at Chateau Thierry." The donor was Major Mieding. One of the corners of the smaller arm of the cross had disappeared, as if it had been carried away by a bullet. Wes noticed this and smiled.

Wes drifted into a kind of calm reverie which lasted perhaps fifteen minutes and might have lengthened into a half hour had he not been disturbed by the presence of another person in the next room. Casually he glanced up and saw the intruder, who however, due to the darkness of the room, had not seen him.

There was a bit of prettiness about her despite the pale, worn face, the whiteness of which was accentuated by her black dress and hat. Idly Wes followed her progress as she aimlessly wandered through the aisles. He would have bet his life that there was a story in that girl.

From his position the cabinet before which he had stood and examined the silver cross a short time before, was plainly visible. The girl was passing it now. Her eyes swept the objects in this cabinet in a listless manner. Then she stopped in front of it and Wes saw her start. What was she looking at in that manner?

She was speaking, speaking to something in the cabinet. With a question in his min as to her sanity, Wes bent further forward so that he could better hear the low sounds.

"Paul," she was moaning half sadly, half joyously it seemed, "Paul. Then you were killed. Now I know why you don't come back to me. Oh, Paul! Now it's mine, Paul. It's mine! They can't keep it; I'm going to have it."

Hysterically she glanced around. Then, to Wes's amazement, the girl seized a small grenade, now empty, that was openly displayed on a stand nearby, and, before Wes could dash in to interrupt her, shattered the glass door of the case and tore an object from its mounting.

Wes had darted to her side. The thing she held in her hand was the silver cross, the silver cross that Major Mieding had—

"Girl, are you crazy? Don't you realize that noise will arouse all the attendants in the building?"

"I don't care; it belongs to me; I gave it to Paul before he left for the front. Now he's dead and it belongs to me."

Wes thought quickly. Then before the girl could protest, he rushed her to a side stairway.

"Beat it quick," he commanded, and, clutching the cross, she disappeared.

When two blue uniformed attendants ran into the exhibit room they found a very bland reporter reaching through the broken glass of a case, removing a gas mask that was advertised as being found at Verdun. Already piled in his arms was a German star shell pistol, a dented metal mirror and a manual on the operation of machine guns.

Three hours later Ole Simpson, the fat good-natured reporter who covered the hotels, gazed at Wes through the bars of a cell door. He was grinning.

"What the devil got into you?" was his first remark. "Trying to start a museum of your own?"

Wes grinned back at him.

"Wait'll Makosky on the police run joins the party, then I'll tell you the whole story."

When Makosky came, Wes told them what had happened that afternoon.

"But what the devil were you doing in the museum? I thought you were out in Whitefish Bay!" asked Simpson.

"I came to look at that silver cross."

"Wha-a-at?"

"Keep this to yourself, and that poor kid who's been waiting for Paul will be happy. That one corner was carved off with a bayonet in a dugout while we were waiting to go on a raid. The cross was found by Major Mieding, our commander. I lost it. It's mine. Maybe Paul's still wearing his somewhere in Marseilles."

Mrs. Getwedd—When you found you couldn't accept the invitation to my wedding why didn't you send your regrets?

Miss Sourgrape—Oh, I thought you'd have enough of your own pretty soon.

Teacher—Why did the people of old believe that the world was flat?

Voliba, Jr.—Because they didn't have a school globe to prove that it was round.

Chestertown Is In Base Ball Race For Keeps

Defeating Easton High, 14 to 8, on Tuesday afternoon, the Chestertown High School baseball team reached the finals in the race for the championship of the Eastern Shore. The contest was staged on the diamond of the Centreville High School.

Briscoe, on the mound for the Chestertown team, allowed only three hits but walked eight opposing batters during the course of the game. He was given good support by his teammates and the timely hitting of Eddie Harris helped to bring about the victory.

Jack Stenger, coach of the Chestertown nine, is keeping his boys in trim for the Shore finals which will probably be staged next Tuesday between Chestertown and the winner of a series between Mardella Springs, Berlin and Greensboro. The winner of the Eastern Shore championship will play the Western Shore titalists for the State crown. The games are under the supervision of the Playground Athletic League.

Chestertown line-up: Johns, rf.; Massey, 1b.; Johnston, 3b.; Harris, lf.; Nicholson, cf.; Reinhart, cf.; Wallis, c.; Briscoe, p.; Falls, 2b.

Choosing His Own Name

At one time it was the custom in the Shetland islands for a man to select his own surname, and the last man to do this was Gideon Manson. The custom followed was for a son to twist his father's Christian name and make that his surname, a fact which explains why Gideon Manson's grandfather was called Magnus Robertson and his father James Manson (Magnus' son).

According to custom, Gideon should have called himself Gideon Jameson (i. e., the son of James), but he chose to be known by his father's surname. This ancient custom led to considerable confusion and was finally prohibited by parliamentary enactment.

Farthest From Land

The farthest distance a ship can sail from land is 1200 miles. This may seem strange, for the Atlantic ocean is more than 4000 miles wide, and the Pacific even wider than that. But there are islands in these oceans, and never can a ship be more than 1200 miles from some point of land. The spot of greatest distance from land, is in the Pacific ocean, half-way between New Zealand and South America.

Can Tire of Peace

Many husbands and wives agree because they chronically disagree. Failing to achieve harmony, they also escape monotony.—American Magazine.

Who Conquers Himself

He conquers twice who conquers himself in victory.—Cyrus.

Early Razors

The ancients used to shave themselves with bronze razors. They made a bronze or brass of tin and copper, which they hardened so that it took an edge like steel.

Up to the Fish

A California scientist says that fish really want to be friendly and, while we are no snob, we do feel that at least they ought to make the advances.—New York Post.

YOU ARE THE DOCTOR!

When it comes to buying gas for your car—you're the doctor.

There's one way to be sure you're right—stop at any station having Amoco and Orange American Gas pumps. For whichever of these products you choose you can't go wrong.

Either of them will be good "medicine" for your motor—pleasant to take, effective in results. Both are available at most good service stations.

Orange American Gas sells at regular price and what a buy it is! "Doctors" interested in initial cost and in getting the best possible performance at no increase in price almost always prescribe it to their "patients".

Amoco-Gas is a premium motor fuel, the product to use for luxurious transportation. It's known not only for keeping motors at the peak of performance but also for helping those that are "sick". Although it costs a few cents more per gallon, more miles to the gallon and reduced operating expenses make it cost less per mile.

Why not let the "patient" be the judge? Try both—then stick to the one that your car likes best. Take your motor's word—it's bound to be right. And take the word of thousands of experienced motorists that if your choice is between Amoco-Gas and Orange American Gas you just can't be wrong.
