A Tandem.

What woman in all the wide world would not be glad to be a tandem for two happy, healthy, prattling babies? When Nature whispers the sweet assurance in a woman's ear that soon a little stranger will come to caress with baby fingers her cheek and neck, she makes the fondest preparations for its arrival. Everything that a woman's dainty taste can imagine is provided for the new-comer's wardrobe. Nothing is overlooked save one thing, and that one thing is the most important. Too many mothers forget that baby's strength and health, its ability to withstand the usual ailments of childhood, and its vigor and welfare, as a man or woman, are dependent upon her own health and physical condition during the period of prospective maternity. If, during that critical time, she is weak, sickly, nervous and despondent, because of troubles peculiar to her sex, these conditions are bound to have their influence upon her baby's health. Neglect of these conditions invariably means that baby will be weak, puny and peevish. Dr. Pierce's Favorite Prescription is an unfailing cure for all troubles of this nature, and it will reinforce a woman's bodily and nerve strength so that she can safely undergo the trials of maternity. It gives health, strength, vigor, elasticity and endurance to the organs specially concerned in motherhood. It gives bodily and nervous hardihood to the child.

"After using fifteen bottles of your 'Favorite Prescription' and a few vials of your 'Pleasant Pellets,' I am entirely cured of uterine trouble. I had suffered for nearly three years," writes Mrs. F. W. Fogel, of 273 Highland Ave., Newark, N. J. "I had such terrible bearing down pains that I could hardly walk. My back and head ached, had terrible cramps in my legs, was very nervous at times, and felt miserable. With my first child I had to be chloroformed and the child was delivered with instruments. I took the 'Favorite Prescription' with my second child, and instead of suffering for two days, I was in labor only an hour and a beautiful child was born. I was able to leave my bed the fifth day. I commenced your medicine about four months before confinement. My baby is three months old now and is a fine, big, fat baby. I am in very good health; have no more pains or aches. I would be pleased to advise any woman who suffers as I did to use your medicine."

Constant Coughing

Constant coughing is not only very annoying, but the continuous hacking and irritation will soon attack and injure the delicate lining of the throat and air passages. A simple cough is bad enough; but a chronic cough is really dangerous. Take advice and use the celebrated Dr. Bull's Cough Syrup at once and be cured.

Dr. Bull's Cough Syrup

Cures a Cough or Cold at once.

Doses are small and pleasant to take. Doctors recommend it. Price 25 cts. At all druggists.

ELY'S CREAM BALM is a positive cure. Apply into the nostrils. It is quickly absorbed. 50 cents at Druggists or by mail; samples 10c. by mail. ELY BROTHERS, 56 Warren St., New York City.

THE ENGLISH NOT PROFANE.

Little Bad Language In London Outside of Petticoat Lane.

Little rough or rude language is used by the English. They even fight without swearing and get very drunk and noisy without employing strong language. They love to chaff and guy each other, and the crowds and the street people who drive horses and peddle goods and hang about the corners are a great deal wittier than most of us give them credit for being, but they seldom resort to bad language. I never heard much of it until I went to Petticoat lane, and I know a woman who has lived here two years and been constantly about town who tells me that in that time she has only heard one oath from an Englishman's lips. The worst word I heard in Petticoat lane was "bloody." That, however, is the worst word I could have heard—in English opinion it is the foulest word there is. I have only heard one man use it and he did not speak it. He was very angry, and he spelled it.

I am telling you this because I know that at home in America we associate it with the English and put it in Englishmen's mouths in our anecdotes, as if it were a matter of course that it should be used to give a local color to an English story. Americans come here and make use of the word for the comic value that they attach to it, and yet I assure my readers that if they tried to think of any really disgusting term they had ever heard and made use of instead they could not more startle or shock these English ears.

English sailors have brought the word "bloody" to our shores—sailors and prizefighters and stablemen, and only such persons cling to it here. What we consider a very much fouler word has a vastly wider circulation, but is not considered as bad as "bloody." All this is very strange and requires a native to explain it, especially as "bloody" is merely the contraction of the oath "by our Lady," which was more or less commonly used in the ancient days when this was a Roman Catholic country.

The people who try to swear without swearing—who in our country say "hully chee" and "by cripes," all use the word "blooming" over here. "I can't very bloomin well make you buy this bloomin thing, but I'll 'ave a bloomin try at it," is what I heard a street fakir say to a crowd the other day. There is no harm in that at all, and it is much more typically English than the word "bloody," besides being decent.

It is funny what mistakes nations make about one another. Over here the very smart thing in reporting the speech of us Americans is to make us all and always call ourselves "Amurricans." It may be true of us. This whole nation believes it. But I never heard an American so pronounce the name of our country, and yet I've got a quick linguistic ear, which is a thing the English utterly lack.—Julian Ralph in Providence Journal.

THE FIRST PHOTOGRAPHS.

Professor Draper's Sister Sat Thirty Minutes For Her Portrait.

Elizabeth Flint Wade has an illustrated paper on "Photography—Its Marvels" in St. Nicholas. The author says:

The first accounts of this great discovery are very entertaining reading. Professor Morse, the inventor of the telegraph, was in Paris when the news was published, and at once went to see Daguerre's wonderful pictures. In describing them afterward he said that moving objects made no impression on the plate, for a picture taken of a crowded boulevard showed it as if entirely deserted, with the exception of a man having his shoes polished. The man's feet, he said, were well defined, because they were kept stationary, but he was without head or body, for these were in motion.

To America belongs the honor of making the first photographic portrait, the artist being Professor John Draper, a professor and afterward the president of the University of New York. His victim was his sister, Miss Catherine Draper. He powdered her face, that the likeness might be more quickly impressed on the sensitive plate, and for 30 minutes Miss Draper sat—or, at least, tried to sit—as immovable as a statue.

The first class in photography was formed in Boston in the spring of 1840 by Daguerre's agent, Gourad of Paris. The Rev. Edward Everett Hale, then a student in Harvard, became an enthusiastic member of the class. In his diary, under date of April 1, 1840, is this entry: "On my way home I stopped at the shop and got my daguerreotype thermometer. There seems to be a great demand; there were three or four others there."

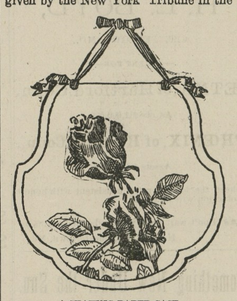
Belt Pin and Belts.

Each new device for effecting an amicable accord between the shirt waist and skirt band receives welcome from womankind. The wrinkle of today, according to The Jewelers' Circular, is to fasten them together with a stout long pin of the nature of a bar pin, which is put in perpendicularly. The silken or narrow leather belt is then slipped through the pin, a plain or handsomely jeweled affair as one chooses.

One of the new wrinkled belts is provided with pretty clasps in shaded silver. These are not more than an inch in width, and they therefore draw the wide ribbon down into the narrow band that so well accentuates a trim waist.

A Dainty Shaving Case.

For those who are utilizing the summer months by making arrangements for their Christmas gifts a suggestion is given by the New York Tribune in the



A SHAVING PAPER CASE.

design for a shaving paper case. It may be embroidered in linen or sketched on cardboard. Tinting on parchment with silver border is another favorite mode of decorating.

Christ's Resurrection.

Christ's resurrection is a pledge and figure of that of the believer. In Christ he sees his possibilities fully realized. His vile body shall be changed and fashioned like unto his glorious body. As he continued in the nature of human body so shall we, but with him we shall be clothed with heavenly light, vigor, beauty and immortality. They shall become spiritual and celestial bodies.—Rev. N. J. Walters, Presbyterian, St. Louis.

Bucklen's Arnica Salve.

THE BEST SALVE in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains, Corns, and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by M. A. Toulson, druggist.

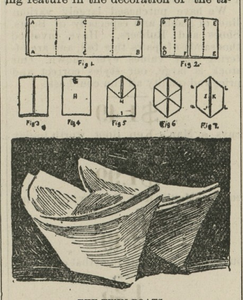
CASTORIA For Infants and Children. The Kind You Have Always Bought Bears the Signature of Chas. H. Fletcher.

TABLE DECORATION.

FANCY SERVIETTE FOLDING AND A GOOD FLORAL SCHEME.

The Twin Boats, a Fascinating Nautical Fold—An Arrangement of Centerpiece, Garlands of Blossoms, Trailing Vines, Ribbons and Fairy Lamps.

Fancy folding of the napkin undoubtedly keeps always a strong hold upon the popular taste, although viewed with disfavor by some social authorities. This is probably owing to the fact that the napkin skillfully arranged can be made a very effective and pleasing feature in the decoration of the table, a point appreciated by every one who values artistic and tempting serving of meals.



THE TWIN BOATS.

Serviette folding comprises in itself a graceful and most fascinating art of no limited extent, as any one will understand who attempts to achieve successfully the cook's cap, the fan, the "Mother Hubbard," the ship, the lily, the lotus, the rose and numerous other designs well known to proficient operators.

As a good illustration of the art and not inappropriate to the naval spirit prevailing in our land, the twin boats design is selected for explanation here.

To produce this nautical emblem first lay the serviette (which should be well stiffened and ironed to a perfect finish) open upon the table and then fold it in three, as shown in Fig. 1.

Fig. 1.—With the right hand fold B B to the center, pressing them down upon C C, and with the left hand serve A A in the same manner, so reducing the length by one-half.

Fig. 2.—Fold E E and D D to the center F F.

Fig. 3.—Now turn this completely over.

Fig. 4.—Place the forefinger of the left hand upon the center, H; slip the forefinger of the right hand beneath the center of the folds at G and bring them carefully down till G rests upon H, as shown in Fig. 5.

Fig. 5.—Turn the serviette round and bring I down on to H in precisely the same way as just described.

Fig. 6.—Having attained the form indicated by Fig. 6, turn it over once more, and but little remains to be done.

Fig. 7.—Slip the thumbs of the right and left hands respectively beneath the center folds at J K, at the same time letting the remaining fingers of both hands rest upon the outer edges L L. Press the fingers toward the center, at the same time opening out the folds at J K gently with the thumbs, and the twin boats are ready for launching—or lunching—as the case may be.

The difficulty attending the choice of flowers for the decoration of our tables at this season is not so much what to employ as what to leave out. With summer flowers lingering and autumn's gorgeous blooms coming on apace material is ready to hand by whose aid any scheme of coloring the most subdued or one glowing with brilliant hues may be carried into effect from nature's own inexhaustible palette. The accompanying illustration may thus be considered in the light of a suggestion for a framework upon which may be built up foliage and flowers of the kind or shade most favored by the decorator for the especial occasion in view.

The four petallike members of the centerpiece, springing from the base of the tall vase, should be of silk, and the vase itself in iridescent glass, in which effects altogether delightful are now obtained. The garland of blossoms suspended from it by means of silk ribbons might have as a foundation copper wire or fine cane and should present no difficulty whatever in construction or arrangement. In the center of each member of the quatrefoil is placed a small fairy lamp, bedded in flowers, and the foot of the vase also is hidden by foliage and blossoms. For the outline of the centerpiece, which terminates in bows of silk or ribbon at the four corners of the table, smilax, Virginia creeper, trailing convolvulus or any vine that lends itself easily to manipulation may be employed.

A DECORATED TABLE.

In this scheme it will be seen that both low and high decorations are happily combined in such a fashion that the objection constantly urged against the latter—namely, that it obstructs the view across the table—is done away with in great part.

When your stomach begins to trouble you, it needs help. The help it needs, is to digest your food, and, until it gets it, you wont have any peace. Stomach trouble is very distressing, very obstinate, very dangerous. Many of the most dangerous diseases begin with simple indigestion (*not*-digestion, *not*-nourishment) *weakens* the system and allows disease germs to attack it. The antidote is Shaker Digestive Cordial, strengthening, nourishing, curative. It cures indigestion and renews strength and health. It does this by strengthening the stomach, by helping it to digest your food. It nourishes you. Shaker Digestive Cordial is made of pure herbs, plants and wine, is perfectly harmless and will certainly cure all genuine stomach trouble. Sold by druggists, price 10 cents to $1.000 per bottle.

Pickled Beets.

Pickled beets differ from almost any other pickle in the fact that they may be prepared at almost any season of the year and are best when fresh. Boil them till they are two-thirds done. This will require slow, steady cooking for from an hour to two hours, according to the season, whether summer or winter. The young small beets of summer require the shortest time. Cut the beets in half inch slices or in fancy shapes, as you please. Add one slice of raw onion to every beet. Throw in six cloves and two blades of mace to every quart of vinegar. Heat the vinegar with the spices boiling hot and pour it over the beets, which should be placed in an earthen crock. Add a tablespoonful of grated horse radish to every quart of vinegar used. These pickles will be ready for use in 12 hours, but they will not keep in perfection longer than two weeks.

ACTIVE SOLICITORS WANTED EVERYWHERE for "The Story of the Philippines" by Murat Holstead, commissioned by the Government as Official Historian to the War Department. The book was written in army camps at San Francisco, on the Pacific with General Merritt, in the hospitals at Honolulu, in Hong Kong, in the American trenches at Manila, in the insurgent camps with Aguinaldo, on the deck of the Olympia with Dewey, and in the roar of battle at the fall of Manila. Bonanza for agents. Brimful of original pictures taken by government photographers on the spot. Large book. Low prices. Big profits. Freight paid. Credit given. Drop all trashy unofficial war books. Outfit free. Address, F. T. Barbee Sec'y, Star Insurance Bldg., Chicago.

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of Chas. H. Fletcher and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and Substitutes are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Harmless and Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhœa and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS Bears the Signature of Chas. H. Fletcher.

The Kind You Have Always Bought In Use For Over 30 Years.

THE CENTAUR COMPANY, 77 MURRAY STREET, NEW YORK CITY.

DAIRY & CREAMERY.

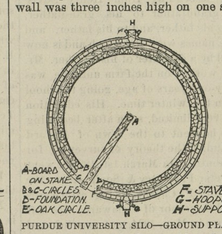
PURDUE UNIVERSITY SILO.

A Simple Plan Involving an Expense of One Hundred Dollars.

H. E. Van Norman, superintendent of the experiment farm of Purdue university, furnishes a plan of a silo recently built at an expense and rental within $100.

Laying Out.—In the center of the silo a stake was driven and sawed off at the height the foundation was wanted—in this instance, three inches above the ground. On top of the stake one end of a board was held by a nail. Five feet, ten inches from the nail a hole was bored and 14 inches farther a second one. With a sharp stick two circles B and C were marked on the ground. The space between was dug out two feet deep for the foundation.

Foundation.—Small stones were used for the grouting underground. A layer of them was placed in the bottom of the ditch, then mortar made of one part lime, two parts Louisville cement and nine parts fine gravel was poured in and distributed with a hoe. After that a second layer of stones put in place, care being taken to have them rest firmly in place. This alternating process continued till level with the ground. For the top few inches below the ground Portland cement and no lime was used. Above ground, which was sloping, the wall was three inches high on one side and 18 inches on the lower side. Large stones laid (in Portland cement and sand one to three) by a mason completed the foundation (D). On it an oak circle (E) (of 2 inches by 6 inches) was bedded in cement. It was made of one inch stuff cut in segments of a circle. These sections, breaking joints, were nailed together, giving the desired thickness.



PURDUE UNIVERSITY SILO—GROUND PLAN.

Staves.—(F) White pine, dressed on two sides, and edges beveled one-sixteenth of an inch, leaving the finished stave a scant 1¾ inches by 5 inches. Twelve and 16 foot pieces make the desired height of 28 feet, breaking joints when put up. In the end of the staves at joint is a galvanized iron strip 2 by 5 inches. Notches for these sawed at the mill.

Hoops.—(G) Ten in number, of five-eighth round iron, with three-quarter inch ends threaded eight inches. The threaded three-quarter inch lugs welded on to the five-eighth rods. Cost $1 per hoop. Each hoop in two pieces to facilitate tightening. As a support for the hoops, (H) when not tight, a 4 by 6 was substituted for a stave on opposite sides of the silo. Through the projecting portion holes are bored for the ends of the hoops, making both a support and tightener.

Erection.—The 12 foot 4 by 6 first put in place, plumbed and braced securely by board nailed to a stake, the braces so placed as to leave one side clear to work on, the top and bottom hoops put in place and the center supported temporarily by a stave. After tarring the ends and edges of the staves they were placed in position and held by a nail driven just under or over the hoop and bent around it. This hoop was firm enough to lean a ladder against; 12s and 16s were put up alternately till the space was full, then that side drawn up. Similarly the other half was put up.

Pieces resting on the 12s and between the 16s made a scaffolding on which to work. The 16 feet 4 by 6 was stood against the silo with the upper end resting between the same staves as the 12 feet. A hoop was put in next the top hole, then two men at each timber raised them, hoop and all, up to their place. A brace to the barn, with one large nail at each end, allowed the pieces to be raised without tipping over. The bottom hoop for the top timber was now put in but not drawn tight. The staves were now put up, a 12 foot on a 16 and a 16 on a 12, and fastened to the upper hoop same as the lower ends, using a ladder leaned against the hoop and standing on the scaffold. It was found more convenient to put the strip of iron in the bottom of the top stave and then guide it to the place in the top of the bottom stave. It would be less trouble to build a scaffolding inside the silo, which would not have to be moved to make room for the upper staves.

Four doors are cut by sawing four staves at an angle of 45 degrees, alongside of stave inside. For the present no roof will be put on.

MUSIC FROM HEAVEN.

Charming German Method of Summoning Church Worshipers.

While religious music will doubtless live as long as religion itself there is one branch of it—if music it can be called—which is luckily becoming obsolete. I refer to bells and chimes. I shall never forget the look of distress with which a famous organist once said to me that whenever he heard a set of chimes he wished he could put his ears in his pocket.

In these days of $1 nickel watches bells are no longer needed to inform people when the service begins. They are, moreover, a decided nuisance, and often a dangerous one, for they have killed many invalids whose life depended upon a few hours' sleep, which the bells murdered. In New York bell ringing has been frequently stopped on account of complaints to the board of health.

If it seems desirable to have a means of summoning worshipers to church, why not adopt the delightful old custom that is still observed in some south German villages and in the city of Stuttgart? There four trombone players ascend a church tower three times a day and play a solemn chorale.

In all my musical experience I have never heard anything more thrilling than those majestic harmonies in the air, which seemed to come straight from heaven. If our churches would adopt this custom and these celestial sounds became associated with religious experiences, they might arouse the dormant devotion of many a one who otherwise would pass the church door by.—Forum.

Power of an Endless Life.

If time were all that there is and death meant annihilation, then life would be a poor thing indeed and man himself would be a poor being. But when we lift the curtain of the future and let the light of an endless life flow back and flood every movement and every activity of this brief existence, how it illuminates it all and lifts it up and makes it great! Nothing can be small, nothing can be insignificant that has any relation to eternity or any bearing on an eternal being or destiny.—Rev. Jacob Klutz, Lutheran, Atchison, Kan.

Robbed the Grave.

A startling incident, of which Mr. John Oliver, of Philadelphia, was the subject, is narrated by him as follows: "I was in a most dreadful condition. My skin was almost yellow, eyes sunken, tongue coated, pain continually in back and sides, no appetite—gradually growing weaker day by day. Three physicians had given me up. Fortunately a friend advised trying Electric Bitters; and to my great joy and surprise, the first bottle made a decided improvement. I continued their use for three weeks, and am now a well man. I know they saved my life, and robbed the grave of another victim." No one should fail to try them. Only 50 cts. per bottle at M. A. Toulson's drug store.

We are Prepared to Quote Specially Low Prices. Lumber, Shingles, Laths, Pickets, Doors, Sash, Blinds, Etc.
