OL. 84. CHESTERTOWN, MD., SATURDAY, AUGUST 25, 1923 N

LETTER OF

OMAR D. CROTHERS

Democratic Candidate for the Nomination of

Associate Judge of This Judicial Circuit

TO THE DEMOCRATIC VOTERS OF KENT COUNTY

At the solicitation of a great number of people in Cecil County and elsewhere, I have decided to be a candidate for the Democratic nomination for Associate Judge n this Judicial Circuit.

Personally, I believe that each county in the Circuit should have a resident Judge, but as the Constitution of the State provides that there shall be only three Judges for the five counties of Cecil, Kent, Queen Anne's, Caroline and Talbot, it necessarily follows that two of the counties must abide the inconvenience of not having one.

Therefore the question which the voters are to decide in the coming election is which two of the three counties Cecil, Caroline or Queen Anne's, shall be put to this inconvenience, or rather, which will be most benefitted by a resident Judge, as the counties of Talbot and Kent each have one, (Judge Adkins in Talbot, and Judge Wickes in Kent), whose terms will not expire for a number of years, and therefor are provided for in this respect.

In deciding this question, it would seem reasonable that the decision should be in favor of the county having the largest population, the largest amount of legal business, the most terms of Court, and the one whose people are most inaccessable to a Judge. Cecil County has a population of 23,612 as compared to 16,641 in Queen Anne's, and 18,652 in Caroline, (census of 1920). Cecil County has three Jury terms of Court as compared with two in each of the other counties of the Circuit. Elkton, the county seat of Cecil County, is thirty six miles from Chestertown, the home of Judge Wickes, and seventy-two miles from Easton, the home of Chief Judge Adkins, as compared with Centreville, the county seat of Queen Anne's, which is sixteen miles from Chestertown, the home of the nearest Judge, and twenty miles from Easton, the home of the Chief Judge, and as compared with Denton, the county seat of Caroline, which is about twenty miles from Easton.

Caroline and Queen Anne's Counties are therefore much more accessable to a Judge than is Cecil County.

From these facts it has always been recognized in the past that Cecil County should have a resident Judge, and it would have now, except for the untimely death of the late Chief Judge Albert Constable, who died after he had served only a few years of the term for which he was elected.

At the present time there is no candidate for Judge in Caroline County, and my information is, that there will not likely be any, so that in reality, the question to be decided is whether Queen Anne's County or Cecil County will be most benefitted by the Judgeship. Senator Legg, one of the candidates for Judge from Queen Anne's, recognizes the claims of Cecil County to the Judgeship in his published statement to the voters of that county, in the following language, "I fully realize that it is a long drive, and many times inconvenient to have to go to Chestertown, and at times still further to Centreville, when matters need the attention of a Judge."

From the above statement of facts, if you believe that Cecil County will be more benefitted by having a resident Judge, and less inconvenienced than Queen Anne's County, which has a Judge residing on either side of it, then I ask for your support, and the people of Cecil County believe and hope that you will at this time recognize its claims.

Assuring you that I will appreciate whatever support you may give my candidacy, I am,

Very truly yours,

OMAR D. CROTHERS.

POLITICAL ANNOUNCEMENT

Centreville, Maryland,
August 3, 1923.

TO THE DEMOCRATIC VOTERS OF THE
SECOND JUDICIAL CIRCUIT OF MARYLAND:

By the Constitution of Maryland, provision is made for the election, by the people, of Judges for the several Judicial Circuits into which the state is divided, among other things, the qualifications therein mentioned for Judges are as follows:

They shall be selected from those who have been admitted to practice law in this state, and who are most distinguished for integrity, wisdom and sound legal knowledge."

If my reputation, after having engaged in the practice of law for practically thirty years, and my record, after having served as Associate Judge of your Judicial Circuit for nearly one year, leads you to believe that I possess the above mentioned necessary qualifications, I will be very grateful should you determine to support me at the approaching Democratic Primary Election.

The duties incident to my present position preclude me from making the usual personal and political campaign.

Very truly yours,

THOMAS J. KEATING.

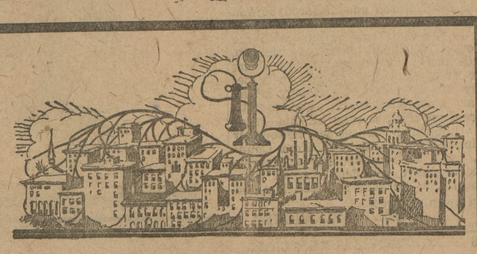
SENATOR J. H. C. LEGG
Candidate For Judge



Busy Lines

When you call a number and the operator reports: "The line is busy," this does not necessarily mean that the person you are calling is actually talking.

It may mean that someone else is calling the same number and the operator is ringing the telephone; it may mean the receiver of the telephone you want has been left off the hook; and it may mean, if it is a party line, that one of these things has happened to ANOTHER TELEPHONE on the line or that it is in use.

Should you receive a "Busy" report and the person called afterwards tells you that he was not using the telephone at that time, PLEASE DON'T CONCLUDE THAT THE OPERATOR GAVE YOU A FALSE REPORT. It may have been due to some of the causes mentioned.

Prolonged conversations contribute greatly to "Busy" lines. It will help us to give better service if lengthy conversations are avoided, particularly if either telephone is on a party line.

It will also be helpful IF THOSE CALLING WILL WAIT A REASONABLE TIME AFTER RECEIVING A "BUSY" REPORT BEFORE CALLING AGAIN.

THE DAIRY

Dairyman, Can You Answer Yes to These Questions?

Do you love the dairy business?
Do you know exactly which cows are making you a labor income?
Do you know each cow's test?
Do you apply your knowledge by sending the boarder cows to the butcher immediately?
Do you know the essentials of feeding the dairy cow?
Do you feed your cows a balanced ration, both as regards the ingredients of the feeds and the cost?
Do you feed regularly?
Do you milk regularly?
Do you exercise care and kind treatment always?
Do you exercise the strictest cleanliness both with the cows and with the utensils?
Do you use a purebred dairy bull?
Do you give your cows adequate shelter?
Do you use adequate bedding?
Do you milk the cows dry and not permit the calves to suck after the first three days?
Do you listen to advice?
Have you a good summer pasture?
Do you like work?
If a man can conscientiously answer "yes" to all of these questions he is not very far wrong on the dairy business.—Harold R. Lascelles, Fieldman, Colorado State Dairy Commission.

KEEP DAIRY UTENSILS CLEAN

Particularly Important That Milk Cans Be Dried and Kept So Until Used Again.

Because bacteria increase in numbers at such an astounding rate when conditions are favorable, it is necessary not only to kill as many of them as possible in order to keep dairy utensils clean and insure a good product; but utensils must be kept dry, so that the few organisms that are left after sterilization will not multiply greatly. In addition to the proper temperature, it is necessary that moisture be present for these germs to grow, but only a very thin film of water is needed.

It is particularly important that milk cans be thoroughly dried and kept dry until used again. They must also be protected from contamination with dust, dirt and flies. Experiments show that in milk cans which were covered before being dried the number of bacteria increased 700 times in 24 hours. Milk put into cans in which the bacteria have been permitted to multiply to such an extent will spoil much sooner than milk put into cans that have been dried before being covered.

To secure rapid drying the cans must be sterilized with steam or boiling water. If the sterilizer is used, the cans may be left in it until time for them to be used again, but there must be some means of ventilation to carry off the moisture. Cans may be set on a rack to dry, but they should be protected from flies and dust, preferably in a well-screened milk house.

FEED SUCCULENCE TO COWS

Corn Silage, Mangel Wurzel or Root Chops Are of Much Importance to Dairyman.

Feed all roughage, such as alfalfa, clover or other hay, fodder and corn silage that the cow will eat up clean. Too much stress cannot be laid on the importance of having part of the roughage of a succulent nature, as corn silage, mangel wurzel or root chops. Generally a dairy cow will eat daily a little more than three pounds of silage and about one pound of hay, or its equivalent, in addition to silage, for every 100 pounds of live weight. At present prices the dairyman cannot afford not to feed grain. The cow should be fed about one pound of grain mixture daily for every three and one-half pounds of milk she gives.

SHOULD USE PUREBRED BULL

Profitable Dairying Depends on Superior Breeding, Good Feed and Weeding Out Scrubs.

Farmers and dairymen cannot continue to use scrub or grade bulls, says A. C. Baer, professor of dairy husbandry at the Oklahoma A. and M. college. Profitable dairying depends on (1) good breeding; (2) weeding out poor cows; (3) good feeding.

A purebred bull will improve all dairy herds which are not now headed by a purebred male, Mr. Baer says. Farmers or dairymen can very often club together and buy a bull which costs more than an ordinary purebred male. Whenever possible, a herd bull should be from a tested dam with a good record.

THOROUGHLY WASH ALL PAILS

Use Brushes and Good Powder on All Utensils—Carefully Avoid All Dishrags.

Thoroughly wash and scald after each use all milk pails, strainers, cans and separators, also milking machine if one is used. Use brushes and a good washing powder. Use no dishrag. Discard the cloth strainer for the wire one, unless it is washed and boiled each day.

SEED WHEAT

"TO BRING PLEASURE TO OTHERS"

The above is the motto of the Loren Bates Trio, who are to give their delightful entertainment on the Chautauqua program here this year. The trio includes Loren Bates, grease paint and wig artist and musician; Miss Blanche Raymond, contralto-pianist, and Miss Leatha Shriber, soprano. Mr. Bates adds some clever character sketches and yodeling songs and Miss Shriber appears in fascinating child impersonations, these being in addition to costume solos, duets and trios. All three are graduates of the Elias Day Lyceum Arts Conservatory.

Loren Bates is most fortunate in possessing a delightful, gracious personality and the happy faculty of making many friends. For a young artist he has accomplished much that is worth while.

He tells his stories naturally and with a fund of humor and pathos. His characterizations are carefully analyzed and worked down to the finest details, while his make-up sketches are unusually artistic.

Miss Leatha Shriber is a young soprano gifted with a sympathetic voice of ample range. Her character songs, which include a children's group, are very popular. Mr. Bates and Miss Shriber will offer a group of quaint old duets, seldom heard but well worth the careful work and costuming.

Miss Blanche Raymond, the third member of the group, is an accompanist of ability and capable of handling her share of the program.
