A. COHEN,

Leaders of Low Prices,

Sandy Bottom, – Maryland.

THE FALL OF NATIONS

How Great World Powers Have Passed Into History.

MOST HAVE DIED FIGHTING.

The Struggle Between the Empire of the East and the Empire of the West. Venice, Its Secret Three and Its Long Reign of Terror.

Most countries which have died have gone down fighting. The Roman empire perished like that, and by the irony of fate the power of the Caesars came to an end far away from Rome.

After it had existed for centuries the Roman empire became so vast and unwieldy that it had to be divided into two, the empire of the west and the empire of the east. The capital of the former was Rome.

The empire of the west became so weak at last that it could make no stand against its enemies. Rome was sacked by the barbarians and eventually became not the capital of a vast empire, but the city of the popes, over which the pontiffs reigned as kings. The temporal power of the popes lasted till 1870, while the capital of Italy was first Turin and then Milan. Finally the city was taken without a real fight by the soldiers of the king of Italy.

The empire of the east had its capital at Constantinople. For centuries it was the greatest power in the world. But it became honeycombed with vice and enervated with pride and luxury; also it grew old and weak. Then in 1422 the Turks made a tigerish spring on Constantinople and took it by storm. The last of the Greek emperors died sword in hand, and his descendants are living in England today in very humble situations.

Egypt, once so powerful and so famous under the pharaohs, was conquered by Rome and was afterward swamped by the Moslems. The crescent was supreme in the land of the Nile, and the aforetime haughty Egyptians were slaves for a thousand years

The great moguls used to reign in India. In the days of Queen Elizabeth the mogul—or emperor of Delhi, as he was sometimes called—was so powerful that he thought it a vast condescension on his part to receive an embassy from the maiden queen. But as time went on the great rajahs, or tributary kings, rebelled against the moguls. India was rent asunder by the wars between rival rajahs. This gave the Europeans a chance.

France at first held the upper hand and nearly conquered the land, but then England drove France back and seized the empire of the great moguls for herself. The heir of the moguls, by the way, still enjoys a pension given by the British government as a compensation for the throne lost by his ancestors.

Poland used to occupy a big place on the map of Europe. At one time it was much larger and stronger than Russia. The czar of Russia and the emperor of Austria were only too glad to be on good terms with the king of Poland, and there was no king of Prussia in those days.

Noble adventurers from all parts of the world flocked to the Polish capital at Warsaw, eager to serve in the Polish armies. The Duke of Monmouth, son of King Charles II. of England, thought of doing this.

But Poland perished through her own faults and follies. The mass of the common people were slaves in all but name. They were not allowed to move from one part of the country to another without leave, they could not own a foot of land, and they could never be sure that they might not be sold by the great noble they served to a new master; hence the nobles and the people never stood together in times of danger or disaster.

Poland was a big country, but it was divided against itself, and Russia, Prussia and Austria combined were more powerful. They all three joined hands, and each took a large share of Poland in 1772. That was the "first partition of Poland." The Poles submitted tamely, for they were still divided.

In 1793 the trio of robbers made a second swoop. Only the ghost of Poland was left. Another year saw the end of the tragedy. The last remnants of Poland were swallowed up by Russia, Prussia and Austria.

The fate of the republic of Venice is one of the most dramatic in all history. For hundreds of years the City of the Lagoons was one of the most powerful states in the world. Its doges ranked as the equals of the proudest kings. Its alliance was coveted by the greatest powers. Its government was one of sheer terrorism. The doge was hardly more than a splendid figurehead. All real power rested in the hands of the dreaded council of ten and the secret three. The latter were a trio of living mysteries and were known by name to practically no one in Venice.

Sometimes a man was one of the secret three and his own wife and children never dreamed it. Their most dreaded servants were masked mutes. If a Venetian, no matter how high his rank, was denounced by the council of ten or the secret three, he knew he was no better than a dead man. So the government of Venice was a terror to its own people and the outside world. Then Napoleon came upon the scene, and "the lion of St. Mark licked the dust."—Pearson's Weekly.

"I have generally found that the man who is good at an excuse is good for nothing else," said Franklin to a servant who was always late, but always ready with an excuse.

A kitchen stove that goes to pieces within four years from the date of its purchase is a swindle at any price.
