FOREIGN NEWS.

ARRIVAL OF THE
Steamer Massachusetts,
THREE Days LATER from EUROPE.

Check in the Money Market—A rise in the Grain Market—Increase in the demand for Cotton—ravages of the Potato Disease—Embarcation of the French troops for Algiers.

The steamship Massachusetts, Captain White, which left Liverpool on the 22d of October, put into Holmes Hole on Wednesday, in consequence of the sickness of the Captain.

The Massachusetts encountered westerly winds and severe weather; and on Tuesday afternoon she ran on Squash Meadow Shoal, but was got off without damage. She had 38 cabin passengers, and 104 in the steerage. She sailed from Holmes' Hole again on Thursday morning for New York, under command of R. B. Forbes, Esq., the owner. The passengers landed and proceeded to New Bedford.

The Holmes' Hole correspondent of the Merchants' Exchange, Boston, states that "the Massachusetts, in coming over the Shoals, on Tuesday, struck on Nantucket Point Rip, and threw over about 50 bags of salt, when she came off. At five p. m., she ran ashore two miles to the eastward Holmes' Hole, on Squash Meadow Shoal, and after discharging into lighters, was got off without damage."

The money market in London had experienced a check, and was tending downwards on account of the alleged misunderstanding between Sir R. Peel and the Duke of Wellington. At least, that was the nominal cause. Consols were quoted on the 21st as low as 93 3-8 to 93 7-8—not having been for several years before marked under 97.

In the Liverpool cotton market for the week ending October 21, there had been a slight increase in the demand, but without alteration in the prices. Sales for the week 20,000 bales. Imports, 143,987 bags.

In the grain market there had been a general rise in the prices of most articles of trade, and in wheat and flour a good amount of business had been done on speculation. The arrivals at Liverpool for the week ending Oct. 20, amounted to 14,000 bbls. of Canadian flour, and 6000 quarters of wheat from the United States.

Accounts of the state of trade in the manufacturing districts in England, show a considerable falling off from the average amount of business. The unexpected decline is attributed to the favorable conclusion of the harvest.

The mania for railway speculation in England continued undiminished.

The continental news is uninteresting. Nothing new in the Paris papers from Algeria.

There is a report that the Prince de Joinville is again to proceed to the coast of Morocco, with a squadron of ships of war to protect the subjects of France, and to overawe the government of Morocco.

The Liverpool Standard states that a meeting of the directors of the leading railway companies is about to be held for the purpose of considering the best means of checking unhealthy speculation in shares of questionable companies, and upholding the character of those which are legitimate.

Mr. O'Connell attended a great meeting of the Repealers at Mayo on Sunday, Oct. 19th. It is stated that 80,000 persons were present, in spite of a great deluge of rain.

The average number of British shipwrecks in a year is 600, the value of property destroyed £2,500,000 sterling, and the number of lives lost 1560.

The accounts of the ravages of the potato disease in Ireland are no more favorable. At least a fifth of the crop, it is apprehended, will be lost. In Scotland the disease has been more extensive than was at first apprehended. The disease was spreading more and more in Denmark and likewise in Sweden. One good effect has resulted from this evil. The Dublin distillers, in consequence of the failure of the potato crop, have advanced considerably in the price of whiskey.

The greatest activity exists in the South of France in preparing for the embarkation of the army of 20,000 men, which is to proceed to Oran, in the west part of Algeria, to hunt down the brave Abd-el-Kader. The troops are to be conveyed to Africa in the steam frigates Labridor, Orenogue, Albatros, Montezuma, Panama, Asmodie and Gower.

EXTENT OF THE OREGON TERRITORY.—On the east, says the London Globe, it skirts 800 miles along the Rocky mountains, on the south 300 miles along the Snowy mountains, on the west 700 miles along the Pacific ocean, on the north 250 miles along the North American possessions of Russia and England. This valley contains 360,000 square miles—capable undoubtedly of forming seven States as large as New York or 40 States of the dimensions of Massachusetts. Some of the Islands on the coast are very large—sufficient to form a State by themselves. These are situate north of the parellel 48. Vancouver's Island, 230 miles in length and 50 in breadth contains 12,000 square miles—an area larger than Massachusetts and Connecticut. Queen Charlotte's, or rather Washington's Island, too, contains 4,000 square miles. On both of these Islands, tho' they lie between the parellels 48 and 54 degrees, the soil is said to be well adapted to agriculture. The straits and circumjacent waters abound in fish of the finest quality. Coal, of good quality, and other veins of minerals, have been found.

☞The following is an inscription on a tomb-stone in Massachusetts. It is beautiful:

"I came in the morning—it was spring,
And I smiled;
I walked out at noon—it was summer,
And I was glad;
I sat me down at even—it was autumn,
And I was sad;
I laid me down at night—it was winter,
And I slept."

A stump orator in the west lately used the following appropriate language.

"If I'm elected to this office, I will represent my constituents as the sea represents the earth, or the night contrasts with the day. I will unrivet human society, clean all its parts, and screw it together again.—I will correct all abuses, purge out all corruption, and go through the enemies of our party like a rat through a new cheese.—My chief recommendations are that at a public dinner given to ——, I ate more than any two men at the table—that I've just bought a new suit of clothes that will do to wear to Congress, and I've got the handsomest sister in Old Kentuck."

THE EMERALD RING.

LOVE'S OFFERING.

It is a gem which hath the power to show
If plighted lovers keep their faith or no;
If faithful, it is like the leaves of spring,
If faithless, like those leaves when withering.

You gave back again my emerald gem,
There is no color in the stone;
It might have graced a diadem,
But now its hue and light are gone!

You gave back my gift; I'll give thee thine—
The kiss that seal'd our last love-vow;
Ah, other lips have been on thine,—
My kiss is lost and sullied now!

The gem is pale, the kiss forgot,
And, more than either, you are changed;
But *my* true love has alter'd not,
My heart is *broken—not estranged!*

Nov. 25, 1845.

PUSEYISM, MORMONISM, and various other "isms," seem to agitate the community at the present time, and to create many bitter feelings among the many disputants. It is acknowledged that they are very exciting subjects, and calculated to 'use up' every person who once gets drawn into the vortex of contention. If the combatants only knew how effectual Sherman's Camphor Lozenges were in keeping down bad blood and restoring tranquility to those who were over excited, they would at once resort to them and thereby be enabled to maintain a proper degree of decency in their behavior, in doing which they would avoid bringing reproach upon the various causes which they endeavor to sustain, especially as it is much to be feared that such hot headed conduct will only hasten the inevitable overthrow which is sure to overtake a bad cause. And not only will Dr. Sherman's Lozenges produce good effects in the above cases. His Cough Lozenges cure coughs, colds, consumptions, asthmas, and all difficulty of breathing. His Worm Lozenges drive away and destroy worms of all sorts in children; and his Poor Man's Plaster will give such strength to a weak back, that, if in any of the above controversies, any of the opponents should close with each other, the one wearing the Plaster on the back will be sure to win the day—he cannot be thrown down. But you must be sure to get the genuine—the counterfeit article will not answer the purpose, although they may look externally like the genuine Sherman's Poor Man's Plaster. Their spuriousness may be known by their not having Dr. Sherman's name and signature upon the back.

For sale at the Drug Store of Messrs. E. M. Dawson & Brother, Easton, and by agents at other stores in the county.

Foreign News.

ARRIVAL OF THE BRITANNIA.

HIGHLY IMPORTANT.—The late hour at which we received our paper last night prevents us giving very copious extracts from the important intelligence brought by this Steamer, which arrived at Boston on Thursday last. The condition of England, in a commercial and financial point of view, is gloomy in the extreme. A terrible revulsion has commenced, greater than that of 1825, and similar to that of 1837 in the U. States. "The revulsion has been produced by the combined influence of a bad harvest all over England and Europe; a bad monetary system, and the unthinking inflation in railway speculations.

All stocks, and every staple is going down—except in the price of breadstuffs, which the impending famine embraces and improves. The terrible movement is just in its commencement. The first blow has been struck—and in Ireland, the agitator O'Connell is already using it for the purpose of opposition to the union.

The English government seems to be in a state of alarm, and Sir Robert Peel is calling cabinet after cabinet, to deliberate on the opening of the ports, and the best means to meet impending famine. Cotton is down—corn is up—and the excitement caused by the revolution is increasing every day. What the result may be, no one can tell—perhaps it is the beginning of the end" of the financial and political superstructure of England and France.

The warlike preparations in Great Britain continue.

The frequent Cabinet Councils, following each other so quickly, had created a good deal of anxiety throughout the kingdom, and it was thought that they would result in the opening of the ports for grain.

TERRIBLE RAILWAY REVULSION.—The railway mania has received its quietus.—Something like a panic has overtaken the speculators in iron highways. Now that the reaction has come it brings in its train ruin and devastation, and bankruptcy to thousands.

The wreck of fortune and of character which this temporary insanity has produced, will be felt long after the causes which have produced it have passed away. As a proof of the extent to which this huge system of swindling has been carried, it may be mentioned that even ladies were not exempt from its influence. * * Famine—gaunt, horrible, destroying famine—seems impending. Fears have seized the public mind.

In Ireland matters look appalling—in England gloomy. The granaries of the continent are exhausted. The corn fields of the Vistula, the Danube, and the Elbe, are barely sufficient for the local wants of the inhabitants. The nation is in commotion; and the cry of "Open the ports and let in corn, duty free!" is heard, on all sides, reverberated from every part of the empire.

The "pressure from without" has made itself heard in Downing street; and faith in the sliding scale—Peel's sliding scale—is gone forever. A third of the potatoe crop in Ireland is destroyed.

The Dublin papers state that the Custom House authorities in that city have been directed to make arrangements for the admission of corn, duty free, on and after the 1st of November.

The news has had the effect of advancing the New York flour market as well as that of other northern cities.
