WHITMAN'S

PREMIUM WROUGHT IRON RAIL-WAY **HORSE POWER.**

AT the great Agricultural State Fair, held at Baltimore, October, 1849, there was the largest exhibition of Horse-powers and Threshing Machines ever exhibited in this State, or at any other State Fair in this country, and all thoroughly examined and tested by a large and competent committee, who awarded the *first premium* to the above power, as the *best* on the ground. More than *five thousand* of these powers are now in use by many of the best Farmers in the country, and they consider them to be *double* in power to any of the best Sweep Powers, more durable and much easier for the horses. CASH PRICE, $100.

E. WHITMAN, JR.,
Corner of Light and Pratt Streets, Baltimore.

☞As evidence that we do not over rate the capacity of this Power, and for the satisfaction of farmers in want of a good machine, we insert the following letter, just received from one of the most intelligent and respectable farmers in Virginia—and we are in daily receipt of letters of the same import from Maine to Texas.

Miller's Tavern, Essex Co., Va, May 20, 1850.

MR. E. WHITMAN, JR.—

Dear Sir:—I have for some time intended giving you a full description of the operation and success of the 2-horse wrought iron Rail-Way Power and Threshing Machine, I purchased of you last May. I will give you a few instances of threshing:—I carried the whole machine between 8 and 10 miles with an ox cart, and set it three times on different farms, and threshed from 115 to 120 bushels of wheat in one day, and each time took the machine out of the cart; made the tables; geared the horses; and commenced threshing in ten minutes. Rev. Peter Ainsley, Col. Richard J. Muse and Musso Garnett, Esq., were witnesses to the above. In another instance, I commenced threshing at Mr. W. R. G. Trible's, at 8 o'clock in the morning, and threshed 92 bushels of wheat by 12 o'clock in the afternoon of same day, and threshed 47 bushels of wheat before sun down. Mr. L. D. Brooks, Mr. Beverly Brooks, and others, can vouch for the truth of this statement. I frequently threshed 100 bushels of wheat from breakfast to dinner time—and during the season, I threshed 38 different crops, making in all 5,450 bushels of wheat, and the wear of the machine is scarcely apparent—and I consider the labor to the horses no more than plowing in light land. I candidly believe, your wrought-iron Railway Horse-power and Thresher surpasses any I have seen, and I find it is now much better since your late improvements have been attached.

You will please have two of your Improved Railway Horse-power and Threshers put up and sent to me by first conveyance they are for two of my neighbors—have them landed at Piscataway Bridge. I think I shall order one or two more of them between now and harvest.

Very respectfully, yours,

june 12. W. G. COVINGTON.

ONE WHEEL POWER.

WE also have the EDDY POWER, which is one of the most simple and durable Sweep Powers now in use. It consists of one wheel only, and the horses work inside of the wheel. It can be transported easily from place to place, in a common farm wagon, and may be set up in 20 minutes, and taken down in half that time. It is simple in construction, not liable to get out of order, and may be easily repaired, the gearing being made entirely of wrought iron. It may work in the open field, though it is better to have it under cover, when stationary, especially during stormy or very hot weather. For efficiency, durability and simplicity, this, for a sweep power, is preferred by many to all others. Price of the largest size, with our late improvements, $100. E. WHITMAN, JR.
