Steam Ship Great Eastern

The Steam Ship great eastern which is being built at Mill Wall England is much larger than was Noahs Ark. The Ark was some 400 ~~feet~~ & fifty feet long, 75 feet wide & 45 feet high. The Great Eastern is 700 feet long 60 feet deep, & some 200, feet at its widest part, The hull is composed of 30,000 iron plates, each fastened with an hundred rivets making 3,000,000, rivets in all & weighs 12,000, tons. The deck will give a prominade of a quater of a mile around; there are accommodations for 4,000, passengers, and in an emergency can carry 10,000, troops. The circumference of the paddle wheels will be over 150 feet each. She will contain 10 Boilers & 100 furnaces will carry 11,000, tons of coal, be lighted by gas made on board, & will spread 6,500, yards of canvas. Her speed will be 18 miles an hour, & will enable her to make the voyage to Australia in a month. Cor. New York Ledger

Life to the unhappy is as a prison, from whose gloom they cannot escape; while to the happy, it resembles a vast palace filled with all that can delight. The prison may be rendered endurable by resignation; but the palace loses some of its bright colouring and gilding every day, untill nothing but faded remnants of its pristine beauty remain
