

7303-1917

GIANTS among American locomotives are the Mallets. This Baltimore and Ohio representative of the type came into service in 1917, weighs 721,000 pounds and has a tractive force of 108,000

pounds. It exerts its greatest strength and operates at its maximum efficiency in the haulage of heavy freight trains over mountain grades. The performance record of the Mallets is a noteworthy one.
