

The Wardens of the Port of Baltimore.

Gentlemen. We the Subscribers hereunto, are laid under the necessity of laying before your body a Complaint, against Mr. Lussier and Company, for putting in their filling of their wharf, into the Basin at the head of the Dock, before their logs are laid to save the Navigation. It evidently appears to us that they care not what becomes of the dock, which if they are permitted to go on with what they are doing will spoil our property — Nor will they fix the frame of their wharf which they have begun where it should be, ^{agreeably to your orders} but keeps sinking it down with timbers, which if they once press into the mud, where is our remedy, we have repeatedly call'd upon them, to do what we think is Justice, but they will not hear —

We do pray a meeting may be call'd, to examine into this Affair as soon as possible.

We are ~~we~~ with due respect &c

9th September 1785

Thos. Morrison,

John Nettle

John M. Donoghue
