Brandywine Mills 11 mo 5th 1802

Chew & Christon

We have your letter of the 3rd from our experience of the fly mt wt we do not incline to be tempted to touch any of it, for even where it appears to have but little yet if so much as to cause any warmth at any time in the wt. it leaves it in a state not fit for good flour, you we are informed are connected with Mills, but apprehend have not yet had so much experience as our S. Canby If however your Millers, who are on the spot buy it we suppose it answers well —

We are scant of wheat, our farmers are not yet thro. their seeding, & should be willing to have a thousand or fifteen hundred Bus. bot If you could procure good Eastern Shore wt. at prices you quote it would suit to draw on Philad.a for pay.t at 60 including discount — If there is none of that kind in the Market we must at pres.t decline

you can let us hear from you

We are your friends Lee

Samuel Canby & Son
