have forgotten where different places are. Byrne is to come in a day or two to see about the cistern some thing has to be done to it at once as it is caving in there is quite a large hole into it now. Do you think that it had better be enlarged or only have the two wells thrown into one with a wall of salmon brick between them. Harry says that there are several of the neighbours who would join us in the load of coal the only difficulty is with regard to the dividing it as we have no scales. Dadie told me to send a kiss to you both. I would like to have some fine tetting now not that I am in a hurry for it only that the next you do I would like it fine. ~~P.S.~~ I want it to give away you may guess who it is for, but ask no questions, and I know that you would rather make it for this person than any one else, after me.

and every thing has to be finnished by the last of July, I think it will be needed before that. I must now close in haste as some one is comming up the road I think Uncle James

Tell Cousin Emily I shall write to her in a day or two. Much very much love to every body from

Your loving daughter
