

May 25, 1932.

My dear Mr. Sisco;

As an architect for the proposed Hall of Records at Annapolis, I have been trying to form a fairly accurate idea of the bulk of material that should be housed in the building. Both Dr. Pleasants and Mr. Dielman tell me that you gave them an approximate idea of the bulk of material in the counties suitable to be deposited in this building, but unfortunately they had misplaced this data. I shall be most grateful for any information that you can give me.

I expect to be in Washington in a few days and could stop to see you if that will be more satisfactory than a letter.

Very truly yours,
