My dear friend

Anna wishes me to write you in reply to your very kind letter of Augt. wh. I do with great pleasure & unite with her in tendering our warmest thanks for the trouble you took in visiting our little ones at Stutgart.

It gives us both much pleasure to know that you were so much pleased with our motherless children & believe them to be under such good management with the excellent lady who has kindly taken them under her wing. May our Heavenly Father watch over them & make them all his own dear children. It is a great happiness to us to feel that,
