Re: Hall of Records.

Mr. E. L. Kries, Chief Engr.
State Power Plant,
Annapolis, Md.

Dear Mr. Kries:-

We enclose print M-3 of the mechanical layout for the Hall of Records. This shows location of all outside services to the building.

The specifications say:

"This Contractor (i.e. the Plumbing Contractor) shall make application and pay for all charges for making connections to the water main in College Avenue, installation of meter, etc. The main shall be brought into the building and the meter installed in a pit provided under the General Contract where shown by the plans. All work shall be done in accordance with the Local rules and regulations."

The line should lie in St. John Street near curb on east side of street. This will save a deeper cut and avoid destruction of shrubs on the campus.

After the bids come in there will be available a number of complete set of drawings and specifications and we shall be glad to see that you get a set.

Very truly yours

HENRY ADAMS, INC.
