My Dear Son

I feel somewhat disturbed by the discovery that there are several cases of small pox within a short distance of us & just on the direction that we should walk if the weather had been suitable. Indeed in the only direction we can walk with any pleasure. What ought we to do?

It would be a very painful position to be placed in shortly after we take it, ourselves, or any one of this family. Telegraph me on receipt of this if you think we ought to

Note yr. anxiety. Question or two very? Mr. Haas is expected here tomorrow.
