1882 June-August Galloway C. Morris incoming letters 1994

except Eleanor whose bowels are somewhat disturbed and we sent the Dr over to see her as we came to the train. I hope this afternoon to find her better.

I am delighted to have such good accounts of you all and hope that the summer arrangements may prove a great blessing to all concerned.

From the tone of Father's letters he is certainly more comfortable mentally than he has been for a long time but I am distressed at his report of the continued swelling of his limbs. Please keep us advised as to his condition.

The more I hear of Lake George the more satisfied am I that the move there for this summer was a judicious one and the best that could possibly be done.

Are you not in want of money there or do you succeed in keeping house upon nothing for them. Love to all the family

Affectionately
Israel W Morris
