Dr. Avery

if she required again she would take her — I only mention this you know in case you might be so situated as to require some one at any time in a hurry.

Poor Hebe! I do feel very much for her. if you see her, please give her my warm love, hers is a very hard lot. I am very glad she has gone to West River, it must be the best place for her just now. what is she going to do? Please let me hear from some of you now & then when you have time — I count on Father for our news paper from you — With much love. Yours most affectionately
