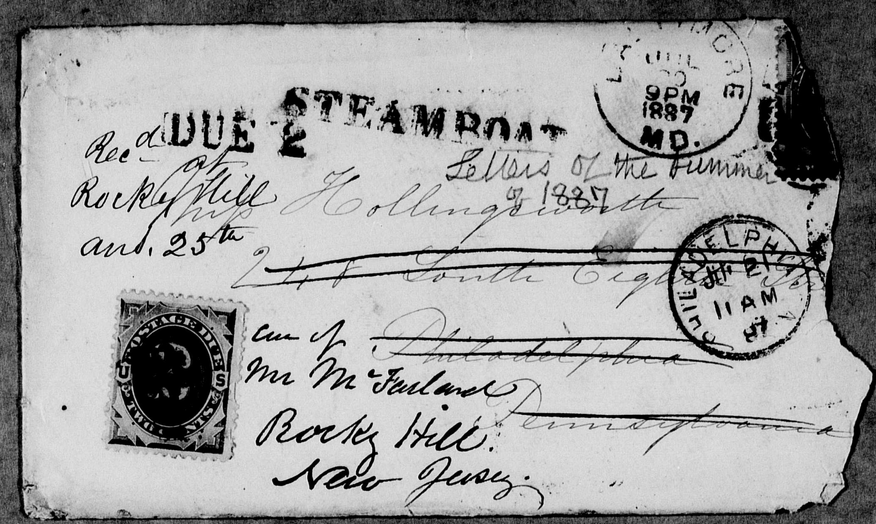
1887 [redacted] Emily Hollingsworth Incoming Letters 1934



up some of the boundaries of the tract. Please remember me most truly to Miss Beach. I can see you now seated together enjoying a communion of heart and spirit felt only by those who have loved as you have and feel the certainty that those dear ones who have gone before are waiting and watching on the other side. Now once more with a heart full of fondest love

Believe me dear Cousin
Your loving child
Mary H. Murray

I trust you will understand dear Cousin that we do appreciate most fully all the love which sent the check - and would accept of it if we felt it right to do so. At present All the girls and Deedie are at home (elsewhere) We could not get Di as she was nursing

Balto. July 16th 1887.

Sample = 3 lbs, 13 oz Manganese ore, in lump - Received July 13, 87 - yields the following results -

Metallic Manganese = 35.12 p
Phosphorous = 00-11 p

Wm. P. Tonry -
Chemist.

Oxide of Manganese = 39.01 = 32.34 man-
Binoxide of " = 32.13 = 32.74 "
Oxide " " = 41.16 = 35.12 "

41.16 oxide of manganese
4.30 silica
.11 Phosphorous
49.57
10.43 Iron, moisture &
100.00
