Cathartic Pills

Combine the choicest cathartic principles in medicine, in proportions accurately adjusted to secure activity, certainty, and uniformity of effect. They are the result of years of careful study and practical experiment, and are the most effectual remedy yet discovered for diseases caused by derangement of the stomach, liver, and bowels, which require prompt and effectual treatment. AYER'S PILLS are specially applicable to this class of diseases. They act directly on the digestive and assimilative processes, and restore regular healthy action. Their extensive use by physicians in their practice, and by all civilized nations, is one of the many proofs of their value as a safe, sure, and perfectly reliable purgative medicine. Being compounded of the concentrated virtues of purely vegetable substances, they are positively free from calomel or any injurious properties, and can be administered to children with perfect safety.

AYER'S PILLS are an effectual cure for **Constipation or Costiveness, Indigestion, Dyspepsia, Loss of Appetite, Foul Stomach and Breath, Dizziness, Headache, Loss of Memory, Numbness, Biliousness, Jaundice, Rheumatism, Eruptions and Skin Diseases, Dropsy, Tumors, Worms, Neuralgia, Colic, Gripes, Diarrhœa, Dysentery, Gout, Piles, Disorders of the Liver,** and all other diseases resulting from a disordered state of the digestive apparatus.

As a Dinner Pill they have no equal.

While gentle in their action, these PILLS are the most thorough and searching cathartic that can be employed, and never give pain unless the bowels are inflamed, and then their influence is healing. They stimulate the appetite and digestive organs; they operate to purify and enrich the blood, and impart renewed health and vigor to the whole system.

The Army Worm.

EAST AVON, June 19th, 1882.

Mr. Editor: The ravages of the army worm having been so great this season, it was thought desirable to subscribers to read an article by Prof. Cyrus Thomas, Carbondale, Ill., which appeared in the January No. *American Agriculturist*. I therefore send you a copy of the article minus the engravings.

Yours truly

W. W. [illegible]

"The appearance of the Army Worm in the region of Southern New York in 1880, and in some portions of the North west in 1881, has again called special attention to it, and has induced entomologists to renew the study of its history and habits with a view of determining, if possible, some points that have hitherto remained in doubt. It is generally known to the readers of the *American Agriculturist*, that these worms after they have completed their time of life in this state, descend a few inches into the ground, and having formed a kind of cell, are changed into shining chestnut-red, or mahogany colored pupæ, or chrysalides. These chrysalides are ultimately transformed into dark fawn colored or pale brown moths.

The life history of the species, or the cycle of things it undegoes, as observed in the latitude of Southern Illinoys, may be briefly stated as follows: The moths make their apperance early in the spring, usually between the first and tenth of April, and soon deposit their eggs. These which are small, white, and about spherical, and placed in the folds of the leaves of grass or grain, the female moth taking particular care to conceal them from sight by pushing them down into the still folded portion of the leaf. In about two weeks thereafter these are hatched into dull or dirty white, 16 footed caterpillars which undergo repeated moultings, gradually acquiring their dark striped color. In their normal condition, they are true cut worms, living this stage of their existence concealed under the the grass cutting it off just at the surface of the ground. When they become excessively multiplied, they assume an abnormal role, becoming a marching or "Army Worm" moving in immense bodies from one field to another. As a general rule they do not commence marching until they are about two thirds gone. So far as I have observed, those leaving one field always march in the same direction but not always, as supposed by some, with unfailing certainty toward another field in which there is proper food. I have seen them leave a meadow in a direct line toward town, the nearest field in that direction being at least a mile off. While it may be and probably is true, that the cause of their marching is, as a general rule, to seek for food, there are certainly repeated exceptions, where they have been known to leave an ample supply. It is also true that they will march occasionally when not in excessive numburs. I observed an insaane of this kind in 1875, when a little straggling "army" left a fine grassy yard, and marched over ground partly denuded, when they were exposed to the hot rays of the sun which they so much dread, a large number of them perishing by the way. This movement was certainly the result of some other impelling cause than the want of food. The habits of the 'worms' are somewhat similar to those of ordinary cut warms, as they avoid the hot sun, coming fourth to feed chiefly in the night, or during cloudy weather. They hide under clods, stones, and other rubbish during the hot and sunny portion of the day. During their life in the larval state, which last about a month, the worms change their skin five times, and having completed their growth, descend into the ground a few inches below the surface, where they transform into pupæ. They spin no cocoon, but by movements of the body and excretions of sticky fluid, usually form a kind of earthern cell, but occasionally they simply crawl into some hiding place to undergo their changes. About 15 or 20 days after entering the ground they reappear as moths, coming out usually about dusk, and climbing up the grass stems where they rest awhile for their wings to dry. In about two weeks after this the female commence depositing their eggs. From personal observation and all the data I have been able to obtain, it is found that the term of life of the individuals in their natural conditions, frrom the time the eggs is deposited until the resulting moth deposits eggs, is, on an average about 77 days:—egg, 14; lavra, 30; pupa, 17, moth, until female deposits, 16 days. The second brood of moths usually appears in this region, in the latter part of June. Their history during the remainder of the year, in their natural conditions, is not so thoroughly known as that during the first half. By a wise provision of nature it is so managed that an excesive multiplication of the species necessarily exposes them to view, and thereby brings upon them an excessive number af parasitic insects. The consequence is that a numerous second brood of worms is an anomaly. I have observed but one fall grass during thirty years' observation, and know of only two well attested cases of the kind in this immediate section in that time. What the species is two-brooded there we know from direct observation, and that the pupæ of the second brood occasionally develop into moths, in the fall is also an established fact, but all the data obtainable show that this is the exception and not the rule; and that on the contrary the mass, in fact, nearly all of the pupæ of this second brood remain in this state over winter, coming out as moth about the first of April. Some experiments made, and others now being made, indicate that in confinement the moths of the second brood usually hatch out, whereas in their natural condition, the rule is for the pupæ, as above stated, to lie over winter. It is probable that in this locality they hibernate in the pupæ state, there are strong reasons for believing that a different rule prevails in the extreme northern part of this State, and also in New York. The determination of this point for the different localities is of some importance, as on it depends, to a certain degree, the value of some proposed remedies. One important fact in reference to their development is, that they do not appear in excessive numbers except in a spring following a dry season. This is important, because it enables the farmers to predict when it *will not* appear, though they may not be able to tell beforehand when it *will*.

Experience since 1844 appears to *demonstrate conclusively* that another requisite, at least in this section, is, that the spring in which they appear shall be damp, or at least cloudy and cool. The year, on the whole, may be more than the ordinary dry and warm, but the spring must be damp and cool in the localities where they appear. But few if any exceptions can be found to this rule; in fact, hot dry weather will soon cause them to disappear. It is a fact worthy of notice, that in Illinois the Army Worm has appeared in the spring, following each chinch bug year.

They have a nice way in Ohio of dealing with the army worm. They plow a ditch and clean it out for the worm to fall into, in their march from field to field and then they hitch a horse to a log and drag the log up and down the ditch night and day until the last worm is crushed. In this way millions are killed with very little trouble or expense.

jun20tf

THE GOLDEN SHEAF.

A Fertilizer specially adapted to the Soil of the Eastern Shore of Maryland.

$20 PER TON.

Sold at a very small profit on cost of production and clear of Agents' commissions.

THE COMPOSITION NO SECRET.

Made Without Sand or Dirt.

FOR SALE BY

THE OXFORD GUANO CO., Oxford, Md.

W. H. SETH, Secretary.

The attention of Farmers who desire to secure a good fertilizer at a reasonable price, is respectfully called to the above named brand.

The object of the manufacturers has been to originate a compound of plant foods directly adapted to the soil of the Eastern Shore of Maryland, and to fix the price therefor at the lowest possible figures, cutting off all agents fees of $5 and $6 per ton and adding to the actual cost only a very small profit. We think this fertilizer has as much intrinsic value as most of the high price manures, and feel confident that farmers who may think proper to use it will say, that in its effects upon the soil, it will equal them.

The analysis, as made by Prof G. A. Liebig, shows it to contain:—

Ammonia, from	1.75 to 1.85 per cent.
Phosphoric Lime, from	4.00 to 7.00 "
Lime	24.10 "
Carbonic Acid	26.67 "

The lime and carbon, which are essential to plant growth, are obtained from oyster shells ground to powder, instead of being burnt. This combination not only dispenses with the necessity for dirt or sand to hold the chemicals, but is a most valuable assistant to their action.

We are also manufacturing ground lime, which we propose to put upon the market at a low price.

FRANK G. WRIGHT.

Easton, June 14, 1881.

Samaritan Nervine.

SAMARITAN NERVINE

SAMARITAN NERVINE

Cures Epileptic Fits, Spasms, Convulsions, St. Vitus Dance, Vertigo, Hysterics, Insanity, Apoplexy, Paralysis, Rheumatism, Neuralgia, and all Nervous Diseases. This infallible remedy will positively eradicate every species of Nervous Derangement, and drive them away from whence they came, never to return again. It utterly destroys the germs of disease by neutralizing the hereditary taint or poison in the system, and thoroughly eradicates the disease, and utterly destroys the cause.

SAMARITAN NERVINE

Cures Female Weakness, General Debility, Leucorrhœa or Whites, Painful Menstruation, Ulceration of the Uterus, Internal Heat, Gravel, Inflammation of the Bladder, Irritability of the Bladder. For Wakefulness at Night, there is no better remedy. During the change of life no Female should be without it. It quiets the Nervous System and gives rest, comfort and nature's sweet sleep.

SAMARITAN NERVINE

Cures Alcoholism, Drunkenness and the habit of Opium Eating. These degrading habits are by far the most vile that have ever befallen suffering humanity. Thousands die annually from these noxious drugs. The drunkard drinks liquor not because he likes it, but for the pleasure of drinking and treating his friends, little thinking that he is on his road to ruin. Like the Opium Eater, he first uses the drug in small quantities as a harmless antidote. The soothing influence of the drug takes strong hold upon its victim, leading him on to his own destruction. The habits of Opium Eating and Liquor Drinking are precisely what eating is to alimentiveness, as over-eating first inflames the stomach, which redoubles its cravings until it paralyzes both the stomach and appetite. So every drink of liquor or dose of opium, instead of satisfying, only adds to its fierce fires, until it consumes the vital force and then itself. Like the gluttonous tapeworm, it cries "Give, give, give!" but never enough until its own rapacity devours itself. Samaritan Nervine gives instant relief in all such cases. It produces sleep, quiets the nerves, builds up the nervous system, and restores body and mind to a healthy condition.

SAMARITAN NERVINE

Cures Nervous Dyspepsia, Palpitation of the Heart, Asthma, Bronchitis, Scrofula, Syphilis, diseases of the Kidneys and all diseases of the urinary organs. Nervous debility, caused by the indiscretions of youth, permanently cured by the use of this invaluable remedy. To you, young, middle-aged and old men, who are covering your sufferings as with a mantle by silence, look up, you can be saved by timely efforts, and make ornaments to society, and jewels in the crown of your Maker, if you will. Do not keep this a secret longer, until it maps your vitals, and destroys both body and soul. If you are thus afflicted, take Dr. RICHMOND'S Samaritan Nervine. It will restore your shattered nerves, arrest premature decay, impart tone and energy to the whole System.

SAMARITAN NERVINE

Cured my little girl of fits. She was also deaf and dumb, but it cured her. She can now talk and hear as well as anybody.

PETER ROSS, Springwater, Wis.

BRICK AND TILE.

Salmon Brick, Arch Brick, Red Brick, Paving Brick, Well Brick, Pressed Brick, and

TILE

from 2 to 7 inches vent, at all prices, from $12 to $75 per thousand.

WE are now prepared to deliver bricks in any part of Talbot county, or anywhere on the water or on railroad out of the county, at 20 *per cent.* BELOW OLD PRICES, *for the cash.* We have a heavy stock on hand, of splendid quality, and are determined to command the the brick trade of this section, if SUPERIOR BRICKS and LOW PRICES will do it.

Our stock of Tile is very heavy, and we sell it very low for CASH; but are prepared to enter into arrangements with farmers, who may want to put in tile, and who may not have the cash, to give them SIX or NINE months credit. The tile ought to go in, and the spring land be made productive, and we are willing to help those who are short of money.

We invite a call from all those in want of either brick or Tile.

JOSEPH H. WHITE, Easton.

DR. TAYLOR'S
COUGH BITTERS or Liver Tonic.
The Champion Chill and Bilious Conqueror. Nerve Strengthener, Liver and Kidney Regulator, Dyspepsia and Constipation Cure of the Age. A medicine—not a drink—which acts upon the Liver, Kidneys, Bowels, Nervous System, &c.; hence a medicine that does this is, in the strictest sense, a BLOOD PURIFIER, and should commend itself at once to those who may be suffering from some of the THOUSAND and ONE symptoms that arise from Liver, Kidney, Bowels, Stomach and Nerve Troubles. Price 75 Cents.
COUGH KILLER or Lung Tonic. A perfect Expectorant and Asthma Relief. Does not check the phlegm in the air tubes as most Cough Syrups do, but removes the deadly poison from the Lungs and prevents Consumption. Price 25 and 50 Cents.
CHOLERA FLUID or Diarrhœa and Dysentery Specific. A new and wonderful Discovery. Suits any age. Never fails. Price 25 Cents.
GIPSY DROPS or Neuralgia Killer, or for any Tearing Pain or Ache whatever, just beats the world. Stops the most violent Fits in 5 minutes. Cures Chicken Cholera. Sure Death to Frostbites and Chilblains. Price 25
