All passengers must be at the various stations at least Thirty (30) Minutes before starting of trains, otherwise they will lay over twenty-four hours.

Freight must be delivered at the freight house the day previous to the day it is to be shipped.

I. M. MILLS, Supt.

July 17, 1882.

Skipton Packet Line.

The Fast Sailing Schooner

ELIZA ANN,

Capt. John A. Catrup, Master. Capacity 5,500 bushels, will be regularly between Wye River and its tributaries and Baltimore. Grain, and all other kinds of freight taken at moderate terms. Also store room for grain at Skipton Landing. Orders left with George E. Bowdoin & Co., Bowley's Wharf, Kenley & Tilghman, Bowley's Wharf, and Emory S. Norris, 33 South street, Baltimore, will be promptly attended to. The patronage of the public is respectfully solicited. All orders for goods must be accompanied by the CASH. Orders may be left with the Captain or at the Landing.

N.B.—The Granary at Skipton Landing has been thoroughly repaired and improved, and is now perfectly secure for the storage of grain. Having leased the granary for a number of years, and embarked permanently in the boating business, I have ample granary and boating facilities for transacting the business of the neighborhood, and respectfully solicit the public patronage. JOHN A. CATRUP.

SKIPTON, June 27th, 1882.

Farmers' And Merchants' Packet Line.

The Schooner Mary Vickers, Clara M. Leonard and Annie M. Leonard.

The above vessels are now running regularly between Baltimore and Tilghman's Island, and will take all kinds of produce, on the most reasonable terms. Every effort will be made to give satisfaction. Our boats are new and built out of the very best material. Orders left with Messrs. G. E. Bowdoin & Co., Commission Merchants, corner of Bowley's Wharf and Pratt St., Baltimore, will be brought or taken at the lowest freight rates. All Grain stored in our Warehouse, in cases of fire will be owners risk. Agricultural Lime delived at the lowest prices. Feeling thankful for the past favors, we solicit a share of the public patronage in the future.

R. LEONARD & BRO.

Office in Tilghman's Island, with E. S. Dixon, on Dover street, Easton.

feb28,81.

Pipe Transportation Line.

Nice Boat, Captain Grason, makes trips, attends to business, leaves Bachelor's Island regularly. Come and see us.

Notice to Travelers.

The omnibuses of the subscriber run regularly from the hotels in Easton to the cars and steamboats, to convey passengers to any place they may desire to go. Passengers at private residences called for at any hour by leaving word at my office, on Dallas Avenue. Horses and carriages for hire at all times at my livery stable. Travellers conveyed to any part of the country or peninsula. Handsome turn-outs always on hand.

LUTHER W. COVEY.

Easton March 25th, 1879.

Livery and Exchange.

FRANKLIN G. WRIGHT, next door to the Easton Gas works, informs the public that he now has the SELOK HOTEL STABLES, near his office, and continues to give strict attention to feeding and grooming horses. He has the best of hostlers and every facility for the accommodation of the public. He hopes by strict attention to business, and good care of horses, to merit a continuance of the public patronage.

March 18, 1882.

Wanted.

A good reliable man to take charge of a farm near Easton. Inquire at this office.

Agricultural.

A Norse Farm.

Our interpreter, like many of his class in Norway, was a scholar and a gentleman, and we perhaps valued his services more in the latter capacity, as we ourselves possessed sufficient knowledge of the language for all ordinary purposes. He was assisted by the farmer's wife, who owned the house and kept us supplied with milk and butter from her dairy. It was a comparatively rich farm, where they pastured fourteen cows this summer, for the hay had been good last year, and upon the excellence of the crop depends the number of cattle these people keep through the winter, as they never buy or sell fodder, each farm being nearly self-supporting as regards feed. There were more than twenty farms in this valley, but only four or five of them were rented by their occupiers, who have always to pay down a large sum on taking possession, with a proportionately reduced yearly rent. The landlords do not seem to take much interest in their property, and as for improvements there is no likelihood of disputes on this head, as things are just where they were 100 years ago. At the age of sixty it is the custom for a farmer to make over the holding to his eldest son, receiving money for his interest and a promise that the son will house and feed him for the rest of his days. Thus the old couple have a quiet old age secured to them, and the farm is worked by active hands. Whether these arrangements have a legal sanction we we know not, but they certainly form the regular observances of a district in many ways remarkable for its maintenance of ancient customs. One of the most curious is the habit of using patronymics, which has died out in many parts of Norway, but is still retained here, and causes a great deal of confusion in successive generations, especially as it is the custom for the eldest son always to be baptized with his grandfather's Christian name thus Eric, whose father's surname is simply Eric Larsen, and isbound to call his eldest son Lars Ericsen. A wife, too, does not adopt her husband's name, but remainins with the euphonious title of, let us say, Petrina Jacobsdatter.—*Macmillan's Magazine.*

Eggs.

The egg trade of this country has risen to an importance which few comprehend. The aggregate transactions in New York City, alone must amount to fully $18,000,000 per annum, and in the United States to $75,000,000 The perishable nature of eggs has naturally detracted from their value as a staple article of diet. The peculiar excellence of eggs depends on their freshness. But lately the new found process of crystallizing has been resorted to, and by this process the fresh egg is coverted into a vitreous substance of a delicate amber tint, in which form it is reduced seven-eight in bulk compared with barrel eggs, and remains in this state for years, unimpaired, in any climate. In this form eggs may be transported without injury, either to the equator or the poles, and when required can be restored to their original condition by simply adding the water which has been artificially taken away. The best egg desiccating companies are located in St. Louis and New York. No additional extraneous matters are introduced in the process of crystallizing the product is simply a concentrated mixture of the yolk and albumen. The shells of eggs are preserved in the spring of the year by lining. Thus treated they are good for every purpose except boiling. It is a common fraud for some dealers to palm off eggs so treated as fresh, so that imposition is easily practiced. In the desiccating process, however, the difference becomes apparent, as from four to five more limed eggs are required to make a pound of eggs crystallized than when fresh are used. and eggs in the least tainted will not crystallize at all.

Rust in Wheat.

The yellow or orange-colored rust that forms on the leaves and stems of wheat shortly before reaping time, is caused by a minute fungus. The fungus plant attacks the wheat some weeks before it makes its appearance, and fills the interior substance of the leaves and stems with its fine threads. These threads act as roots, by means of which the fungus or rust plant obtains its nourishment from the substance of the growing wheat plant. There is no remedy for the rust after it has once appeared upon the surface of the wheat. The most effective preventive is blue vitriol or bluestone (sulphate of copper,) two or three ounces of this salt to a bushel of wheat. The wheat is soaked in the brine for a short time before sowing. There has been much energy expended in the endeavor to find some variety of wheat that is rust-proof. Prof. Brewer, who has charge of the grain statistics in the late census, finds many districts where a variety of wheat has sprung up, that for a year or so is almost rust-proof, but it soon becomes infected the same as other sorts. As a precaution, burn the stubble, thus destroying many spores that would otherwise germinate and continue the pest.—*American Agriculturist.*

Engineers of steamships have found that the best lubricants are glycerine for the cylinders and castor oil for the bearings. Castor oil is used for the main bearings seldom become heated. Only the best glycerine can be employed with advantage.

Certain varieties of evergreens, such as arborvitæ, are furnished with a thick bark. These may be cut away in part, so as to allow of close contact of the soil around the base of the plants.

One of the happiest and most independent of human occupations is that of an intelligent farmer, whose land is paid for and who keeps out of debt.

Common salt is a special nature for asparagus beds when used with rich barnyard compost.

The Manchester, a new variety of strawberry, is said to be better adapted to sandy soils than most others.

Malaria, Chills and Fever, and Bilious attacks positively cured with Emory's Ague and Liver Pills—an infallible remedy; never fail to cure the most obstinate, long standing cases where Quinine and all other remedies had failed. They are prepared expressly for malarious sections, in double boxes, two kinds of Pills, containing a strong cathartic and a chill breaker, sugar-coated; contain no Quinine or Mercury, causing no griping or purging; they are mild and efficient, certain in their action and harmless in all cases; they effectually cleanse the system, and give new life and tone to the body. As a Liver Complaint their equal is not known; one box will serve a wonderful effect upon the worst cases. Sold by Druggists everywhere, or sent by mail, 25 and 50 cent boxes to Emory's Little Giant Pills, best ever made, only 15 Cents. Standard Cure Co., 114 Nassau Street, New York. 4:16,2m

Ayer's Hair Vigor,

FOR RESTORING GRAY HAIR TO ITS NATURAL VITALITY AND COLOR.

This elegant preparation, which is at once harmless and effectual, for preserving the hair. It restores, with the gloss and freshness of youth, faded or gray, light, and red hair, to a lustrous brown, or deep black, as may be desired. By its use thin hair is thickened, and baldness often (though not always) prevented from falling of the hair immediately, and causes a new growth in all cases where the glands are not decayed; while to brashy, weak, or otherwise diseased hair, it imparts vitality and strength, and renders it pliable.

The Vigor cleanses the scalp, cures and prevents the formation of dandruff; and, by its cooling, stimulating and soothing properties, it heals most if not all of the humors and diseases peculiar to the scalp, keeping it cool, clean, and soft, under which conditions diseases of the scalp and hair are impossible.

As a Dressing for Ladies' Hair The Vigor is incomparable. It is colorless, contains neither oil nor dye, and will not soil white cambric. It imparts an agreeable and lasting perfume, and as an article for the toilet it is economical and unsurpassed in its excellence.

THE GOLDEN SHEAF.

A Fertilizer specially adapted to the Soil of the Eastern Shore of Maryland.

$20 PER TON.

Sold at a very small profit on cost of production and clear of Agents' commissions.

THE COMPOSITION NO SECRET.

Made Without Sand or Dirt.

FOR SALE BY

THE GOLDEN SHEAF CO., Office, Md.

W. H. SIMS, Secretary.

The attention of Farmers who desire to secure a good fertilizer at a reasonable price, is respectfully called to the above named brand.

The object of the manufacturers has been to originate a compound of plant foods directly adapted to the soil of the Eastern Shore of Maryland, and to fix the price therefor at the lowest possible figures; cutting off all agents fees of $5 and $6 per ton, and adding to the actual cost only a very small profit. They think this fertilizer has as much intrinsic value as any of the high price manures, and feel confident that farmers who may think proper to use it will say that its effects upon the soil will speak for themselves.

The analysis, as made by Prof. G. A. Liebig, shows it to contain:—

Ammonia, from	.75 to 1.25 per cent.
Phosphoric Lime, from	5.00 to 7.00 "
Lime	32.10 "
Carbonic Acid	32.57 "

The Sand and Carbon, which are essential to plant growth, are obtained from oyster shells ground to a fine powder, instead of being burnt. This combination not only dispenses with the necessity for dirt or sand to hold the chemicals, but is a most valuable substitute to their notion.

We are also manufacturing ground lime, which we propose to furnish the market at a low price. aug5,81

CARRIAGES.
