Skipton Packet Line.

The Fast Sailing Schooner

ELIZA ANN,

CAPT. JOHN A. CAUFLEY, Master, Capacity 5,500 bushels, makes regular trips between Wye River and its tributaries and Baltimore. Grain, seed and other kinds of freight freighted on moderate terms. Ample store room for grain at Skipton Landing. Orders left with George E. Bowdoin & Co., Bowley's Wharf, Kenley & Tilghman, Bowley's Wharf, and Emory & Neavitt, 88 South street, Baltimore, promptly attended to. The patronage of the public solicited. All orders for goods must be accompanied with the CASH. Orders received at Skipton by the Captain or J. A. F. Neal.

N. B.—The Granary at Skipton landing has been raised two feet above tide, thoroughly repaired and strengthened, and made perfectly secure for the storage of grain. Having leased the granary for a number of years, and embarked permanently in the boating business, I have ample granary and boating facilities for accommodating the business of the neighborhood, and respectfully solicit the public patronage. Horticulture.

(Nashville, Tenn., Southern Industries)

When judiciously and intelligently conducted no class of industry pays better than horticulture. In this climate a hot-house with a thorough heating apparatus is obligatory, though once the first outlay is made, the resources of such a building are almost unlimited. Under the influence of a genial heat the winter months are as favorable for forcing the growth and flowering of plants almost as the natural warmth of the summer, and it is here where the profits of the cuttivator are made. Winter is the season for balls, parties, festivals, and all kinds of reunions, and nothing supplants flowers for decoration purposes and the wealthy will pay any price to have them. To the grower, the trade in cut flowers is far more profitable than that of the plants though when well supplied with suitable appliances for their cultivation, the combined buisness is most profitable.—Many men have made large fortunes at the trade. Others more scientifically inclined cultivate for new varieties of flowers; when they succeed in establishing a peculiarity in a plant, causing it to produce a flower of an unknown kind, bearing a different perfume and odor, then in proportion to the excellency of the newly developed species, does the florist derive reputation and realize profit.

Horticulture is a study which should be encouraged in young people, for noting tends more to refine the manners and sentiments than the literature pertaining to the science and varied beauty of the flowers themselves.

At one time the rage for the tulips was so great in Europe that prices paid for bulbs of favorite and rare varieties were fabulous. Holland was the center of the highest culture of these lovely plants, and to the gardens of that wonderful country amateurs and scientific growers flocked like the faithful do to the tomb of Mohammed. Two and three hundred dollars per bulb was a common price, and some sold for a much higher consideration.

Floral shows have grown into popular favor, and stimulated the energies of gardeners to such feats of culture that one of these exhibitions defies description—thousands of varieties of roses and other flowering plants, bearing their variegated tints and perfumes, are there seen and enjoyed, nature is made to almost contradict herself by producing monstrosities, which result only from experimental breeding, as it were, until the original stock upon which the crosses were made lose their identity entirely, by resolving themselves into a being hitherto unknown. Single flowers become double, solid colors mixed, perfumes changed, and even the nature of the plants' wants succumb to the skilful manipulation of the scientific gardner's will. Then when perfection has been reached, and flowers bud out at every branch, commences the intricate and infinite good taste displayed artistic ability surprising to behold.

Flowers are mute, yet they boast of their own language, in which one versed endless conversation can be carried on in it.

By all means cultivate flowers. Nothing in art equals their beauty, and nothing in life so elevates the soul as an intimate and constant communion with them.

Guinea Hens.

If a man can stuff his ears with cotton, or move out on the prairie where he has no neighbors, it will pay to keep a few guinea hens. They lay more eggs than the common fowls.

It is also claimed that one of them will keep half an acre of potatoes clear of beetles, etc., and at the same time answer the purpose of a barometer in detecting all changes in the weather. They are good eating and very pretty. Don't buy old birds unless you want to hear the neighborhood high and low for them every evening.

House Flies.

The following remedy is recommended by a Iowa lady to keep flies from the house, and as it is cheap and ornamental it will be well to adopt it: "For three years I have lived in town, and during that time my sitting room has been free from flies, three only walking about my breakfast table, while all my neighbors rooms are crowded. I often congratulated myself on my escape, but never knew the reason till this year, a few days ago. I then had occasion to remove my goods to another house, while I remained on for a few days longer. Among other things removed were two boxes of geraniums and calcearias which stood in my window, being to its full extent, top and bottom. The boxes were not gone half an hour when my room was as full of flies as those of my neighbors around me. This to me is a new discovery, and perhaps may encourage others in that which is always a source of pleasure, namely, window gardening. Mignonette, planted in long, shallow boxes, placed on the window sill, will be found excellent for this purpose."

An Off Hand Way to Measure an Acre.

A measuring cord should be part of the furniture on every farm. To make one, procure sixty-seven feet of strong rope, one inch round; make a loop or faster, a ring or bar at each end, and make these precisely sixty-six feet apart. This is four rods. Then tie a piece of red rag in the centre. One acre of ground will be a piece four of the cords (chain,) long and two and one half wide, equal to sixteen by ten rods, making 160 square rods to an acre. The advantage of the ring or loop is that one person can measure along by driving a stake in the ground to hold the rope while he stretches it out. The rope should be soaked in tar and dried, which will prevent it from shrinking when wet.

Brick-red long-wristed kid gloves are all the rage.

Alarming!

COLDS that settle on the lungs soon become very dangerous if not promptly treated with HALE'S HONEY OF HOREHOUND AND TAR. Sold by druggists.

Malaria, Chills and Fever, and Bilious attacks positively cured with Emory's Standard Cure Pills—an infallible remedy; never fail to secure the most obstinate, long standing cases where Quinine and all other remedies failed. They are prepared expressly for malarious sections, in double boxes, two kinds of Pills, containing a strong cathartic and a chill breaker, sugar-coated; contain no Quinine or Mercury, causing no griping or purging; they are mild and efficient, certain in their action and harmless in all cases; they effectually cleanse the system, and give new life and tone to the body. As a household remedy they are unequalled. For Liver Complaint their equal is not known; one box will have a wonderful effect on the worst case. They are used and prescribed by Physicians, and sold by Druggists everywhere, or sent by mail, 25 and 50 cent boxes. Emory's Little Cathartic Pills, best ever made, only 15 Cents. Is a compound of the virtues of sarsaparilla, stillingia, mandrake, yellow dock, with the iodide of potash and iron, all powerful blood-making, blood-cleansing, and life-sustaining elements. It is the purest, safest, and most effectual alterative medicine known or available to the public. The sciences of medicine and chemistry have never produced so valuable a remedy, nor one so potent to cure all diseases resulting from impure blood. It cures **Scrofula and all scrofulous diseases, Erysipelas, Rose, or St. Anthony's Fire, Pimples and Face-grubs, Pustules, Blotches, Boils, Tumors, Tetter, Humors, Salt Rheum, Scald-head, Ring-worm, Ulcers, Sores, Rheumatism, Mercurial Disease, Neuralgia, Female Weaknesses and Irregularities, Jaundice, Affections of the Liver, Dyspepsia, Emaciation, and General Debility.**

By its searching and cleansing qualities it purges out the foul corruptions which contaminate the blood and cause derangement and decay. It stimulates and enlivens the vital functions, promotes energy and strength, restores and preserves health, and infuses new life and vigor throughout the whole system. No sufferer from any disease which arises from impurity of the blood need despair who will give AYER'S SARSAPARILLA a fair trial.

It is folly to experiment with the numerous low-priced mixtures of cheap materials, and without medicinal virtues, offered as blood-purifiers, while disease becomes more firmly seated. AYER'S SARSAPARILLA is a medicine of such concentrated curative power, that it is by far the best, cheapest, and most reliable blood-purifier known. Physicians know its composition, and prescribe it. It has been widely used for forty years, and has won the unqualified confidence of millions whom it has benefited.

Made Without Sand or Dirt.

FOR SALE BY

THE OXFORD GUANO CO., Oxford, Md.

W. H. SETH, Secretary.

The attention of Farmers who desire to secure a good fertilizer at a reasonable price, is respectfully called to the above named brand.

The object of the manufacturers has been to originate a compound of plant foods directly adapted to the soil of the Eastern Shore of Maryland, and to fix the price therefor at the lowest possible figures; cutting off all agents fees of $3 and $5 per ton and adding to the actual cost only a very small profit. We think this fertilizer has as much intrinsic value as most of the high price manures, and feel confident that farmers who may think proper to use it will say, that in its effects upon the soil, it will equal them.

The analysis, as made by Prof G. A. Liebig, shows it to contain:—

Ammonia, from	1.75 to 1.25	per cent.
Phosphoric Lime, from	5.00 to 7.00	"
Lime	33.10	"
Carbonic Acid	26.07	"

The lime and carbon, which are essential to plant growth, are obtained from oyster shells ground to powder, instead of being burnt. This combination not only dispenses with the necessity for dirt or sand to hold the chemicals, but is most valuable as a assistant to the action.

We are also manufacturing ground lime which we propose to put upon the market at a low price.

Rex 1,330 is considered the best bull in America, and was purchased last December by his present owner at a cost of $8,500. "Favorite of the Elms" 1656, the Grand-dam of Gay Primrose, has a butter record of 17 pounds 5 ounces per week, and her owner, Mr. John J. Holly, of New Jersey, has refused $2,500 for her.

At the auction sale of the herd of Jersey cattle of Messrs. Corpa, Madnix & Co., at New York on Friday, May 12th, 65 head of cattle brought an avsrage of $622.77 per head. This sale shows the present value of high-bred Jerseys.

"Favorite's Greatorex" 5,898 will be permitted to serve a few registered cows this season at $10 per service. Cows for service will be cared for at $1 per week.

OF LONG EXPERIENCE.

I would respectfully inform my friends and the public generally, that I am now better prepared to furnish everything in the furniture line, than I have been in the past.

My ware-house contains 3500 square feet of flooring, which is at all times covered with stock pertaining to my business, and which will be sold as cheap or cheaper than can be bought here or elsewhere.

Having no other trade or profession, I am in the business for life, health permitting, and do not intend to be undersold or excelled in any particular pertaining to my business.

Myself and son Harry will give our personal attention to the business, and I recommend him as capable to attend to all business in my absence.

REPAIRING

done neatly and with dispatch. Stock of

always on hand made to order. Thanking you very kindly for your patronage in the past, I earnestly solicit a continuance in the future.

Undertaking a Specialty.

I shall continue to give the undertaking department of my business my special attention, and having had thirty odd years experience in the business, I feel sure I can give satisfaction in the attention of all funerals entrusted to my care

I have one of the best hearses and keep in stock everything necessary to furnish the best funeral.

Corpses preserved in ice when requested. Remember my prices shall be as low as the very lowest. Respectfully,

JOHN MASON.

To the Farmers.

THE TALBOT COUNTY PAPER MILLS COMPANY will now contract for WHEAT STRAW, to be delivered at a convenient time hereafter. A little more care in stacking and ricking, will insure so much better keeping as to enable farmers to spare at least half of their straw, the cash for which would nearly pay for their phosphates Apply to
