THE "MORNING GLORY"
BASE BURNING STOVES,
PARLOR FURNACES
AND
*PORTABLE HEATERS.*

BURN all the gas in the coal, and all the coal to ashes, without waste, thus producing what has never before been accomplished,
*Perfect Combustion of Coal.*

Consequently, with half the fuel they will make double the heat of any other contrivance for house-warming ever invented.

1. Their operation is simple and kindling an annual ceremony only.
2. Light a fire in autumn, replenish coal and remove the ashes once daily, and they go on burning until spring.
3 They radiate an even, gentle and healthful heat, with none of that abominable smell of gas and burnt iron, so usual in common Stoves.
4. They will burn as briskly by day and as slow by night as is desired, and can be regulated to give the degree of heat required in any climate.
5. They completely VENTILATE and ILLUMINATE the room, thus making them as healthy and cheerful as an open fire.
6. They are made entirely of Cast Iron, and will not rust out as will Sheet Iron Stoves.
7. Being based upon scientific study and experiment, they must necessarily supercede all others
8. Manufactured in Baltimore, repairs can be had at short notice and trifling cost, while the cost and difficulty of getting repairs for Stoves made at a distance generally makes it preferable to buy a new one.
9. Their rapidly increasing popularity having induced many to imitate them, the public should beware. Ask for and buy only the "MORNING GLORY." For sale by N. J. WILSON.
