THE WORLD WE LIVE IN

Townsend Leaders Break

Washington—The end of the Townsend plan was envisaged in some quarters following the resignation of Robert E. Clements, co-founder and guiding hand of the Old Age Revolving Pensions, Ltd., resigned as secretary-treasurer. Clements broke with Dr. F. E. Townsend on the question of starting a third party, with Townsend against it.

Flood Assistance

Washington—The government has swung all its forces behind flood relief. The go-ahead was given to the FHA to issue loans to industry as well as private homes, to the RFC to handle industrial loans above $50,000, to the WPA to broaden their activities in flooded regions and to Federal engineers to speed up flood control.

Cure Worse than Ailment

Keyport, N. J.—Asserting that the effects of a lightning bolt striking outside her window cured her, Miss Adeline Slover, 40, claimed a miraculous cure as she walked around her home after being bedridden for years with arthritis in the arms and legs.

Anti-Noise Drive Backfires

New York—It is a good rule that will work two ways. Mayor La Guardia conducted a successful campaign against noise and it has worked around to the city garbage trucks. Apartment house dwellers objected to the racket made in a garage by the trucks at night and James Gilroy, superintendent of the garage was haled into court. Now city officials are trying to get rid of the noise.

Tragedy Links Mdivanis

Palm Beach, Fla.—Tragedy linked the two Mdivani princes, Alexis and Serge even in death. When Alexis was killed in an auto crash in Spain he left a string of polo ponies to Serge. The latter decided to learn to play polo and was fatally hurt when a pony after a fall kicked him in the head. Both Mdivanis had married Louise Ven Alen.

One-Day Women's Strike

Washington—Miss Charl Williams, head of the National Federation of Business and Professional Women's Clubs urge all the 10,000,000 women working in the United States to go on a one-day strike to show the men that they can not get along without women workers. Miss Williams says there would be no telephones, maids, secretaries for business men, schools or even breakfasts.

Pilots As Stylists

Ketchikan, Alaska—Plane pilots in Alaska have to know their way around in stores. Air companies offer a shopping service for their clients and pilots occasionally have to know the right shoes to buy for an order that reads, "Bring my wife a pair of shoes: she's big on the feet" or a hat for a woman 5 feet 3 by 145 pounds.

Wouldn't Prod Themselves

Philadelphia—City controller Dr. R. C. White wanted to know what sort of people were among those who owed the $34,000,000 delinquent taxes. He sent an auditor to check the books of delinquent tax collectors and discovered that five delinquent tax collectors were themselves delinquent in payments.

Disapproves Butts

Helsingfors,—Finland—After a thorough investigation Dr. C. A. Wallgren comes up with the admission that he does not know which is the preferable form of smoking, pipe, cigar or cigarette. But he does put thumbs down on smoking butts or the last third of the tobacco lighted.

A Shorter Lent

Philadelphia—Rev. Dr. D. M. Steele rector emeritus of St. Luke's and Epiphany P. E. Church believes the Lent is too long these days. He would cut the time to one week which, he says, would be of greater benefit to laymen and less trouble for the clergy.

Contribution Record

Washington—Jesse H. Jones, treasurer of the Will Rogers Memorial Fund announces that contributions to date amount to $1,750,000, a record for voluntary contributions of the sort.

Brotherly Love

White Plains—Rather than embarrass her brother, Harry L. Hopkins, WPA administrator, during the coming election Mrs. Ada Hopkins Aime has resigned her job as Tri-county director of the National Youth Administration.

Both Ends of the Line

Montgomery, Ala.—Miss Toccoa Cozart who was a fare in 1886 on the first trip of the first electric trolley in Montgomery and the world was also a passenger, but a guest one, when the company sent their last trolley on the tracks this week. Back in 1886 the new line which displaced mule-drawn cars was called the Lightning Express.

Rich Country, Yukon

Vancouver — Jean Fournier, Bear Creek Roadhouse manager, came out of the Yukon country for the first time in eight years to report that the depression never hit Yukon. The only people on relief were too old to work, he says, common laborers get $5 a day and miners demand the comforts of the city.

If You Please

Paris—The Paris phone company has added a new aid to laziness. For a reasonable charge any one can dial S V P or s'il vous plait (if you please) and order the family shopping done, or ask information about the day's news or general information. Practically any service may be ordered or any type of information secured.

Walker's a Walker

Philadelphia—After sixty years on the job John Walker is the only one left of the men who used to walk around the city lighting gas street lamps. Although the 20,000 gas lamps now light automatically Walker walks ten miles a day checking up on them. His route once covered 25 miles a day and in 60 years it is estimated that he has hoofed 90,000 miles.

"Wife vs. Secretary" On Local Screen

Myrna Loy, Clark Gable and Jean Harlow form an eternal triangle of celebrated stars in "Wife vs. Secretary", film slated for the Centreville Opera House for a three-day run beginning today, Thursday. Interwoven is a story of big business methods as practiced in the high-pressure world of modern finance. May Robson, Hobart Cavanaugh, and George Barbier are in supporting roles.

Chevrolet's high-compression valve-in-head engine gives economy without equal!

Every test *proves* it's more economical . . . Every Chevrolet owner *knows* it's more economical . . . And every person will readily understand these simple A-B-C reasons why it *is* more economical

The Chevrolet engine is the most economical automobile engine produced today, because (1) it is a *six-cylinder* engine, and (2) it is a *valve-in-head* six-cylinder engine. . . . Its *six cylinders* use less gas and oil—in fact, use the *least* gas and oil—because six cylinders are the most economical combination used in modern automobiles. . . . Its *valve-in-head* design cuts gasoline consumption still lower because *there is less loss of heat through the walls of the combustion chamber* in valve-in-head engines, and the advanced construction of the Chevrolet engine gives maximum heat (or power) saving. . . . Most important of all, Chevrolet's more efficient cooling system, pressure stream oiling and the greater accessibility of all working parts result in more dependable operation, over a longer period of time, with the lowest maintenance costs.
