Eastern Shore Esso Dealers Hold Meetings

Film "Magic Of Oil" Shows Advanced Laboratory Tests

A large group of Esso dealers and their employes on the Eastern Shore attended a very successful meeting which was held at the Hotel Avon in Easton last night, Wednesday.

At the meeting, the Esso Marketers' new Motion Picture, "The Magic of Oil", was shown. This picture is a dramatic and scientifically accurate story of the laboratory development work undertaken for many years to produce superior motor oils.

"In the making of this picture", said E. R. Smith, local representative of the Esso Marketers, "micromotion picture photography was used for the first time. The microscopic work was done with the aid of Henry Rogers, who worked on this field for 11 years with the Rockefeller Institute.

"Special apparatus had to be developed, "said Mr. Smith, "to cool a drop of oil under the microscope to 20 degrees below zero. When the camera turned unusual precautions had to be taken to eliminate vibrations from the cameras, which would have prevented the photography of microscopic wax-crystals. These unusual shots show what happens when wax particles of oil congeal, and pictures how science has effected methods of refining which retard the formation of wax-crystals and prevent their congealing into a solid mass that cannot flow."

Representatives of the Delaware-Maryland-D. C. Division of the Esso Marketers who attended the meeting were: W. H. Evans, Manager; E. S. Biggs, Assistant Manager; E. P. Coffay, District Sales Manager; L. T. Gutting, Sales Assistant, and R. W. Tighe, D. F. Fisher, and L. W. Schubert.

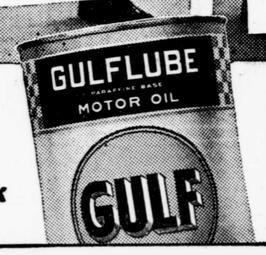
GET GULFLUBE— It's "Stripped for action"!

A boxer clad in full evening dress would be fighting under a bad handicap. Cheap, poorly refined motor oils are just as hampered. They can't fight friction efficiently because they're laden down with excess waste.

When the boxer sheds some of his clothes he's like most 25c oils—free from *some* hampering waste, but not *all*. Until Gulf perfected its great Multisol process, no refiner of 25c oils could afford to go beyond this stage.

The boxer stripped for action is like Multi-sol refined GULFLUBE MOTOR OIL. It's stripped of *all* excess waste—ready to do the finest friction-fighting job of any 25c oil made! The only 25c oil matching premium-priced oils! Try Gulflube — as the Sign of the Orange Disc.



THE PREMIUM-QUALITY MOTOR OIL FOR 25c

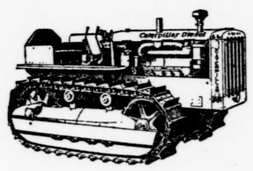
IN REFINERY-SEALED CANS . . . OR IN BULK

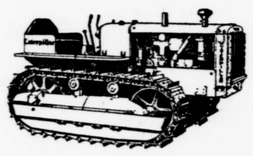
LUBRICATE-FOR-SAFETY WEEK MAY 23-30

A well-lubricated car is a safer car. Bring your car to Gulf for an expert lubrication job. Don't take chances.

PLOWING

. . . on ONE GALLON of Diesel Fuel Per Acre





FOUR SIZES OF "CATERPILLAR" DIESEL TRACTORS—TO PULL FROM 5 TO 15 MOLDBOARD PLOWS—TO GIVE YOU THE RECOGNIZED LOWEST - COST POWER THE WORLD OFFERS. REQUEST FREE LITERATURE AND INFORMATION NOW.

This 60-horsepower "Caterpillar" Diesel Tractor is moldboard plowing rolling land on one gallon of 5-cent fuel per acre. This size pulls 48 feet of rod-weeder or duck-foot (under average local conditions)—to cultivate 12 acres an hour on 3½ gallons of low-cost Diesel fuel!

With "Caterpillar" Diesel Tractors, grain growers are reducing their cash costs of farming 50% and more—as compared to gasoline power costs!

Designed to be powered by heavy-duty "Caterpillar" Diesel Engines, "Caterpillar" Tractors have big reserves of strength in all parts—ample and properly placed weight to take full advantage of non-slip track-type traction. Generous use of alloy steels, advanced heat-treatments and complete dust protection put "Caterpillar" Tractors in a class by themselves for low-upkeep and steady performance!
