A new and practical Work.

A PROPOSAL,

By William Y. Birch, & Abraham Small,
Of the city of Philadelphia,

For publifhing in volumes, by fubfcription, that ufeful and popular work, the

DOMESTIC ENCYCLOPÆDIA;

OR, A

DICTIONARY OF FACTS,

AND

USEFUL KNOWLEDGE:

Comprehending a concife view of the lateft difcoveries, inventions, and improvements, chiefly applicable to rural and domeftic economy. Together with defcriptions of the moft intereting objects of nature and art; the hiftory of men and animals, in a ftate of health or difeafe; and practical hints refpecting the arts and manufactures, both familiar and commercial.

Illuftrated with numerous engravings and cuts.

By A. F. M. Willich, M. D.
Author of the Lectures on Diet and Regimen, &c.
Firft American edition,
With additions, applicable to the prefent fituation of the United States,
By James Mease, M. D.
Fellow of the American Philofophical Society, and correfponding member of the Literary and Philofophical Society of Manchefter.

To the Public.

AS the practical tendency of the work here announced, muft be evident from the contents of the preceeding title its peculiar nature fcarcely requires further explanation.

When we confider the natural condition of man, the object of all his purfuits becomes at once manifeft and defined. To live with fatisfaction to himfelf and others, to procure as many comforts of life as are confiftent with his mental and bodily conftitution; and to avert impending danger, or, in other words, to preferve himfelf from the injurious attacks of external agents, are nearly the whole of what relates to the practical part of human life. The prefent work being exclufively devoted to the departments of health and general economy, no fubject could with propriety be introduced, which had a reference to ethics or morals, to metaphyfics, or the abftract and profeffional fciences.

In order to unite concifenefs with general utility, the theoretical or fpeculative part of every invention, difcovery, or improvement, forms but a fmall portion of the Domeftic Encyclopædia; becaufe the *rationale*, or elementary principles, are only inferted in thofe inftances where the fubject cannot be fufficiently underftood without them—And as the alphabetical form poffeffes many advantages over the fyftematic divifion and fubdivifion of articles, it has in the prefent cafe, been preferred, as more eligible for a popular work.

It will be eafily conceived, that the fubjects treated of in this collection muft be numerous and important; inasmuch as the economical fciences are intimately connected with natural and experimental philofophy, including the knowledge of ufeful animals, plants, and minerals; chemiftry, agriculture, gardening, hunting, the cultivation of trees, rearing of cattle, fifhing, &c. To enable, however, the reader to judge of the method by which fubjects apparently intricate and abftrufe, are reduced to the level of ordinary capacities, the following heads will furnifh an outline of the economical dictionary:

1. A concife hiftorical account of the fubject under confideration, or the manner in which it is moft advantageoufly produced, either by nature or art—for inftance, fuel, candles, hats, fhoes, wine, yarn, &c.

2. The moft judicious and economical mode of applying every fubftance to ufeful purpofes.

3. All the newly difcovered methods of defending the objects of domeftic and rural economy, from the effects of air, heat, and cold, the changes of climate, feafons, and other contingent caufes; likewife, the moft effectual way of preferving particular fubftances, fuch as feeds, roots, plants, &c from the depredations of infects, reptiles, and other animals

4. An explanation of the general effects which every article of food and drink, as well as all external and contingent caufes, produce on the health of the human body; together with the moft approved rules and directions for its prefervation.

5. As the lift of human afflictions contains many and obftinate diffeafes, fuch as cancers, confumption, epilepfy, gout, palfy, white fwellings, &c. which have hitherto been for the moft part confidered as incurable, a concife and faithful account of the lateft and moft plauffible remedies, or methods of treatment, is given.

FROM this account of the *Domeftic Encyclopædia*, it muft be obvious to all, that the nature of the work is peculiarly adapted to the prefent wants of the United States. Perhaps it contains a greater number of *ufeful facts* than have ever appeared in the compafs of four moderate volumes. No pains, trouble, or expence appear to have been fpared to render this economical dictionary as complete as the prefent advancement of agriculture, gardening, of the familiar arts and manufactures, as well as the imperfect ftate of medical fcience, would refpectively admit. It includes almoft every object more or lefs connected with rural, domeftic, and animal economy. Hence the reader will find numerous experiments related, *many hundreds* of which have not hitherto been publifhed in the Englifh language.

With regard to the additions, the editor will obferve, that no exertions fhall be wanting on his part, to render them as ufeful as poffible, to the people of this country—As no other diffeafes but thofe enumerated in article five, are introduced in the original work, and as it is peculiarly adapted to the fituation of perfons in the country, remote from medical aid, it has been deemed neceffary in the prefent edition to detail the moft approved methods of guarding againft the attack of diffeafes, commonly prevalent in the United States, of curing them when actually prefent, and of treating the various accidents to which agricultural people are liable. There fhall alfo be given, as full an account of all the poifonous plants growing in the United States, as can be obtained.

Care fhall be taken to detail all the difcoveries which have been made in the United States—Thefe will be found to be more numerous than is generally imagined—Many machines for diminifhing labor, and which are peculiar to this country, fhall be defcribed and illuftrated by plates.

The veterinary science comprehending the application of the principles of medicine, to the prefervation of the health of domeftic animals, and the cure of their diffeafes, fhall alfo claim a due degree of attention—That deftructive and native diffeafe, the *yellow water* of horfes, fhall be defcribed, and a *fucceffful method* of cure pointed out.

Laftly, the object of the work being to fupply families with a compact guide, in all economical affairs, every ufeful fact in rural and domeftic economy, omitted by Dr. Willich, and which may be known to the editor, fhall be inferted; and in order to take advantage of progreffing improvements, arrangements have been made to have all the periodical works on the above fubjects, forwarded as foon as publifhed in England or France.

The editor will thankfully receive any communications which may tend to improve the work and he begs leave refpectfully to folicit them.

The publifhers have but little to add for themfelves; knowing, that profeffions generally are, and, perhaps, ought to be, in a great meafure, unavailing, they refer the public to the books they have already publifhed. They have given to the world two editions of Dr. Ruffel's Modern Europe, within the laft three years; the manner, therefore, in which they execute their undertakings, can be afcertained. In the prefent work, if they do not advance much, they pledge themfelves not to degenerate. It fhall be printed in the firft ftyle of uniformity and tafte. The paper fhall be fuperfine; and the engravings at leaft equal to thofe in the London copy.

CONDITIONS.

I. It fhall be printed in five large handfome octavo volumes. One volume fhall be delivered every three months. Price to fubfcribers, two dollars and fifty cents per volume, in boards, payable on delivery.

II. The firft volume fhall appear on the firft of April, 1803, and a volume regularly every three months afterwards.

III. It may be had in one delivery when finifhed, at twelve dollars and fifty cents per fet, or fifteen dollars well bound, payable on the delivery of the books. It will, however, be only obtained at thefe prices, by thofe who give the publifhers their names during the procefs of the work, to take it when finifhed.

IV. At any confiderable diftance from Philadelphia, it can only be delivered in the laft mentioned manner—the forwarding of fingle volumes to many places being impracticable

N. B. The public will pleafe to notice, that the amount in price of this improved and extended work, is not higher than the London work in four volumes.

*** Among the numerous *original* articles which will appear in the firft volume of this work, and the fubftance of which is not contained in any other Encyclopædia, we fhall enmerate only the following: Abdomen abortion, abfceffes, abftinence, adulterations, agriculture (in general), agues, air, ale and beer, animation (fufpended), anodynes, antidotes, apoplexy, apples and apple-trees, apricots, afparagus, baking, barley, barometers, bedfteads, bee, bees and bee-hives, beet-root, blacking (Frankford), bleaching, bleedings, books (popular), bread, breath (offenfive), brewing, bricks (indeftructible), buildings, burials, burns, butter, &c. &c

☞ Subfcriptions will be taken in at any of the bookftores in Baltimore.
