SEVERE BREAK IN GOODRICH RUBBER

THE COMMON STOCK DROPPED MORE THAN EIGHT POINTS.

The Preferred Stock Also Suffered a Heavy Loss—General List Moved Upward for a Time, but Later the Market Slipped Backward and the Early Advances Were Cancelled.

New York, March 12.—For a time after the opening of the stock market today the upward movement of the previous session was continued. London again sent over higher quotations for American stocks, and there was considerable buying in this market for foreign account. Covering of short contracts contributed to strength and many standard issues were marked up a point or more. The demand was not keen, however, and after the first hour the market began to slip backward. Early advances were cancelled, and the list was forced low yesterday's close.

Financial conditions here and abroad again exerted a large influence on the stock market. Call money rose to 6 per cent., the highest rate since the first of the year. For time money 5½ per cent. was offered for all maturities, but even these bids failed to bring out large offerings. The money market was influenced by exports of gold and the expectation of a poor bank statement on Saturday.

It was reported that negotiations were under way for shipment of $5,000,000 gold to Berlin. German bankers bid 9 per cent. in this market for accommodations over the end of the month. Houses with German connections, however, said their advices indicated the financial pressure in Germany had about reached its maximum.

Prospects of further extensive gold exports were lessened by a pronounced slump in foreign exchange rates. Demand sterling broke 50 points.

Some of the inactive stocks moved more widely on the decline. American Sugar broke 3 points from its high price on publication of an annual report showing a large decrease in earnings. Goodrich was particularly weak, the common falling over 8 points and the preferred 6½.

Rates for Money.

New York, March 12.—Money on call firm at 4¼a6 per cent.; ruling rate, 4¼; closing bid 5, offered at 5½. Time loans strong; 60 and 90 days, 5½ per cent.; six months, 5¼a5½. Prime mercantile paper, 5½a6 per cent.

Foreign Exchange.

New York, March 12.—Sterling exchange weak, with actual business in bankers' bills at 488.25 for 60-day bills and at 487.40 for demand. Commercial bills 483.

Alexander Brown & Sons report the sterling market weak, as follows: Bankers' sterling, demand, 488½; 60 days, 484½; actual rates for round amounts, demand, 487½; 60 days, 483½; commercial, 60 days, 482¼a483½. Bankers' francs, demand, 516¼; 60 days, 520⅝; commercial, 60 days, 522½. Bankers' reichsmarks, 95½; 60 days, 94½; commercial, 60 days, 94¼. Bankers' guilders, 40¼; commercial, 40; 60 days, 39¾.

Bar Silver.

New York, March 12.—Bar silver was quoted at 57⅞c. Mexican dollars 48.

LOCAL STOCK EXCHANGE

BALTIMORE, March 12.

The absorbing power of the market is of small degree and it is due to the comparative absence of pressure to sell that prices hold up as well as they do, though many manifest evidences of droopiness. Some of the gas and power issues continue decidedly heavy. Consolidated Gas Electric Light and Power 4½s lost 2 points, having sold down to 87½, which compared with 89½, the last previous sale at the close of last week. Although no sales of Consolidated Power shares were recorded the common stock was offered at 110, which is a further decline of 1 point. United Railways issues were slightly easier, and Houston Oil was fractionally lower. New Orleans and Great Northern 5s yielded 1 point, to 67. Maryland Electric 5s, at 97, showed a fractional decline.

In addition to disinclination on the part of buyers to enter the market because of a feeling of cautiousness, money has tightened and this has had probably a further restrictive influence.

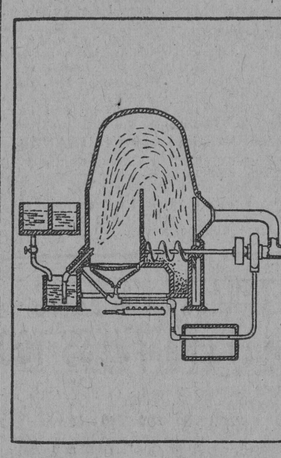
FOOD MADE FROM WHEY

Apparatus Converts Liquid By-Product Into Edible.

One more by-product has been utilized. A New York man has invented a machine for making food from whey. The food consists of a whey powder that contains approximately 75 per cent. of milk sugar, 15 per cent. of milk albumen and 10 per cent. of mineral salts, and is substantially free from fat and casein. When the casein, etc., of milk is coagulated



FRESH WHEY IS DRIED.

by renents and acids, as in making cheese, the clear liquid that remains behind, and which is chiefly milk sugar, is whey. In this apparatus the whey is sprayed into a chamber in which there is intense heat. Most of it is dried almost instantly, and as it drops down on the other side of a barrier in the chamber it is sucked into a pipe which conveys it to a storage chamber. Particles that are not converted into powder fall to the bottom of the first chamber and remain there.
