Sunnyside February 3rd 1830

John Tilghman Esq.

Dear Sir

I did expect getting to have received from you a certified copy of a law of your State authorizing the removal of the black people but on the Estate late the Hon. M. Tilghman by the citizens of this State, but to this day I remain without a line from you on the subject, – some of the purchasers are getting quite impatient to know the result, and again a number of the black people remain on the farms and will be at considerable expence to send them off. Bramble says he has no directions to keep them and again there is no provision on the lands except corn. – I am in hopes by the time this is handed to you that you may have received a certified copy of the Law and that you will forward it to me by the bearer hereof
