Elliston March 5th

Dear Sir

Messrs Milton & Carrier, makers of Alloy threshing machine have agreed to make you a first rate machine by the 25th of May next as requested. I have taken care to provide that it shall be made to work with a leather band instead of a rope. I will occasionally superintend the making and have no doubt you will be pleased with its operation. I regret that you should have found it necessary to apologize for what you term trouble. It gives me pleasure at all times to serve my friends in whatever I can be useful & I hope you will command my services freely when required.

Very Respectfully Yours
James Swaze
