Mr Tilghmen November 21st 1843

Sir — I suppose from the way our hogs looks now they will be fit to kill by the last of the month They are getting in pretty good order now the small ones though are much the fatest I am done huskingco n the crop is by my account with what has been used 165 barrels long, and about 35 short probably there might have been a little more I am now filling up the Hog pen when that is done and some other little jobs we shall get the manure out it is too miry now to do much with it

The Boat will not be ready to take the the wood before the last of the week as she has to go to Easton to move Mr B McDaniel

very respectfully

Wm Robinson
