Mr Tilghman 13th November 1848

Sir - you wrote that I must inform you when I was done lofting Corn and how much there was of it. I finished last Saturday there is by cart measurement 95 barrels of the white and about 45 yellow of longcorn I did not measure the short but there must have been 50 barrels at least. the hogs eat about a barrel a day and they have been up 6 weeks to day they are getting in good order

Emory got home on Saturday the 11th but did not get any home I shall get to hauling manure in two or three days time should it not be too wet I suppose it will be as well when you come down to look over our acts I mention it because I dont know when you may get down again I expect to go to Baltimore after the hogs are killed I have a good deal to get this fall and but little to get with and think that I can get some articles in Baltimore cheaper than here. If you write before coming yourself say if any of the manure is to go on the large Lot the part next the road wants it

Respectfully

Wm Rollerson
