Comments.

ANTEEAN, 19010, is a solid seal brown in color, and in conformation and gait, at a trot, nearly perfect. He is full of nerve power, at the same time tractable Like his sire, Anteeo, 2.16¼, he promises to develop extreme speed at a trot, and when matured the public will see in him a great race horse. As a stock horse we have great faith in him, and for that reason placed him in the stud in 1892 to serve fifteen mares so as to have his colts come on at an early date to demonstrate what we say to be true. His grandsire, Electioneer, 125, is acknowledged to be the greatest of all sires of trotters; his son, Anteeo, 2.16¼, (sire of Anteean), is his best producing son, and has a fast record. He has already fourteen of his sons and daughters in the 2.30 list, and one son, Anteeo, Jr., that has sired a 2.30 performer in Scramble, 2.24½ The Electioneer blood is now the ultra fashionable. It is breeding on with the same certainty as that of George Wilkes, and with more extreme speed and purity of gait. Anteean's dam is a natural trotter, with extreme speed, as her work illustrated when in training as a two-year-old; since then she has been kept breeding, she being considered too highly bred to be kept out of the stud. Her sire Great Hopes, 4374, now has two in the 2.30 list, and is one of the very best bred sons of Happy Medium, (sire of Nancy Hanks, 2.04, &c.,) and his dam was by the great Volunteer, 55, sire of St. Julian, 2.11¼, one of the greatest of all campaigners. In Anteean's second dam we find the blood of the great Belmont, 35, sire of Nutwood, 2.18¾, who sired the dam of the two-year old Arion, 2.10½. In his third dam we reach Woodford Mambrino, 2.21, one of the greatest race horses that ever lived in his day, and sire of the dam of the sensational Kremlin 2.07¾. His fourth dam, (is the dam of Lady McFatridge, 2.29.) by Bay Chief, son of the great Mambrino Chief, 11, sire of Lady Thorn, 2.18¼, another great campaigner. His fifth dam is by the world-renowned Pilot, Jr., 12, one of the greatest of all sires of brood mares, siring the dams of Maud S., 2.08¾, J. I C., 2.06¼, and other cracks. An Electioneer stud, with such a rich backing, would be a winning card to any stud, and the best in the land will come to his embrace.

HIS STUD SEASON WILL BE MARCH 1 TO JULY 1, 1893,

AT POPLAR GROVE FARM.

Mares bred in 1893 that fail to prove in foal will have return privilege the Spring of 1894.

We have placed his fee at the low sum of $50, due at the time of first service or on the demand of the undersigned. His sire Anteeo's stud fee this year is $1000.

Mares kept at $10 per month, stabled and grained, and at pasture at $4 per month; all bills must be paid before removal of mares. The same care will be taken of mares as of my own, but we will not be responsible for accidents or escapes.

Visitors can reach here by rail from the north to Centreville or by Chester river boats, from Baltimore daily, except Sunday, landing at Add. Emory's wharf or Indiantown, about one mile to our stables.
