This horse is a little sore in his forward feet. They are contracted and do not grow, which shortens his gait and causes him to stumble, all of which is very annoying: and he can be cured of his lameness by using Dr. Wood's Phenomenal Liquid Blister and resting him up a little. From one to three applications will do it. Directions for use accompany every bottle. Put up in 2, 4, 8-oz. bottles. Price, $1, $1.50, $2.50.

THE FOOT

Is the most important part of the anatomy of the horse, and usually secures the least attention. No campaigner or city roadster has absolutely healthy feet. The constant pounding on hard surfaces is unnatural—it eventually produces contraction, which is the seat of most hoof troubles, such as corns, quittor, navicular disease, ossified cartilages or side bone, quarter crack, thrush, scratches, nail bruises, crooked feet, etc. I guarantee that my Spiral Spring Hoof Expanders will cure any curable case or refund your money. My Expander cures by going direct to the base of the trouble and removes the CAUSE. It compels a natural expansion and healthy growth, keeps the feet perfect, the horse in condition, and improves his speed and driving qualities. Does not interfere with his work. Write for instructive circulars and proof of my claims. It costs you but the price of your letter.

I have a horse sick with **Shoulder Lameness**, and it seems to give almost instant relief. I cannot speak too highly of it.
