ALINE

Awarded Silver Medal, London, 1885, the Sole Award to Any Such Preparation.

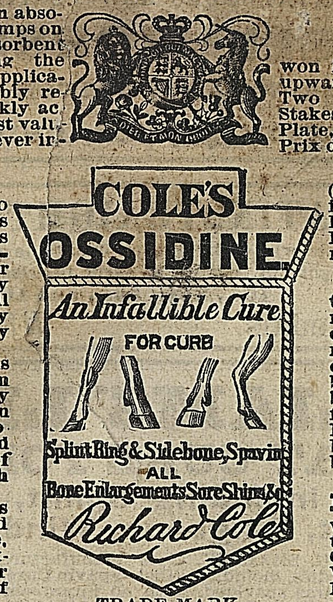
This scientific preparation is an absolute cure for all bony or callous lumps on horses, and is a more powerful absorbent than "firing," without creating the slightest blemish. After a few applications the excrescence is so palpably reduced that even the sceptical frankly acknowledge that it is by far the most valuable outward remedy for horses ever invented.

OSSIDINE

Is very difficult and expensive to prepare, but when the marvelous cures it effects, notably in the cases of the celebrated race-horses **Paradox** and **Ormonde** (the latter winner of the English Derby of 1886), are borne in mind, it will be found that this is undoubtedly a cheap article, and worth many times its cost.

No stable should be without this invaluable absorbent. It has **been tried** without a single failure by the greatest judges of horses in the world, and an eminent osteologist has highly praised it, and justly termed it the **Acme of Science of the Nineteenth Century.**

OSSIDINE never blemishes however frequently repeated, and will keep for years in any climate, having been already largely exported to the Colonies. Last year race-horses absolutely cured of **Splint, Curb, Ringbone, etc.,** by the use of



TRADE MARK.

OSSIDINE,

won in England stakes amounting to upwards of $60,000, including the Two Thousand Guineas, Champion Stakes, Criterion Stakes, Dewhurst Plate, etc., and in France the Grand Prix de Paris.
