35 Nassau St.
New York

Dear Sir:—

Replying to your letter of the 19th inst. I am enclosing a sketch which contains the information you asked for. The terminal point or sta. 0 of our M.L. line we have called mile 43.867 or mile post 43 will be located at our station 45+97.22. The miles being measured from West to East. To date we have been able to locate but one but & one stake on a standing position of the old surveys. For the foregoing reason we have not given the calculated bearings. We hope to strike a point or two so that we can accurate the between the lines.

Yours truly
Chas. J. Brown
