(3)

Steady rain all day. The creek has been tolerably quite. Frequent showers but not cold. The mice are all well in spite of damp clothing wet feet.

I received the last of the creek the 200 photo prints, showing performances 120 000 orders sent out by your office.

The pay roll and requisite account I am sending under separate cover.

Yours truly
Lloyd J. Carroll

P.S. I find the old survey stakes are about as much better protection than the mice are found least of any thing. We have not needed to resort to poisoning. One might be to the old survey P.S. will make an observation in Sirius the first clear night to give us a course that we can use.
