Mr F. C. Zerbler
35 Nassau St
New York

Dear Sir:

Your letter of the 27 inst. covering payroll, checks & table of bridge weights received.

It would be a help to us if another column could be added to the table of dimensions giving the width between piers

ie

This is necessary in figuring lateral clearance and if Boller Hodge & Board can furnish it, we will be saved considerable trouble.

Received from you under separate cover unsealed proofs showing cut off & tunnel sections
