Dear Sir:-

Your two letters of the 18th received. I have just wired you as follows

"Line Thursday night - Station ten hundred & fifty, Iron Market, tangent built off one mile west Poddo bad"

I am making every effort to push the work. We thought the first of the week has again given us very bad roads.

In yesterday's work we repeatedly crossed stakes of another survey between the pumping station & Market. The stations on them evidently started off the vicinity of West Apollo & runs west.
