(2)

Will you send me not a print of this tracing as it is a very handy map to use as a reference.

As there seem to be discrepancies between the lines of the old maps and the checks we have gotten on the old lines I have need the Government data.

Shall I send you on the tracings of the land the maps as each State miles are completed? We will also have the first section of the reduced profile (40 feet to the inch) ready as soon as the grade line is plotted on it. Shall we have the grade line in pencil?

Yours truly D. T. Evans
