F. B. Hodito, Consulting Engineer
35 Pacific St.
New York

Dear Sir:—

Saturday night we have reached station 1703, making a total of 251 stations for the week. Considering the weather we have been having, we have made good time for it. The roads have been blocked with snow, so that we have had over a mile and a half a great deal more than the normal amount of cutting. A heavy fall of snow on Friday night brought the total depth up to 22 inches, and it snowed all day Saturday. The coming off of our hole made the total depth of snow 32 inches.

Yours truly,
[illegible]
