E. A. Moller Cons. Engr.
35 Nassau St
New York

Dear Sir—
I am sending you under separate cover a tracing of the first 10 miles of letters lines
The drainage areas + charging for the barrel culverts I will mail you tonight.
Sta 393 there are two stations that are below the tunnel grade, but as it would be a difficult construction problem to take out 2 stations in the middle of a hill + also be a bad place for pumping we moved the tunnel up to the grade line.

The line between sta 519 + 520
