(2)

mmo nto the ground connecti-
ng the three tides projected. This
could be remedied by carrying
the dam out about 60 ft.
and so as to throw the line
at this point south, which
should give a more cert-
of not dry.
I note at date 1595 your
projection passes thru Ca
Church & consequently will
reach that point today +
if you mark the line of ship-
to the south of these rocks
so you can change it if appro-
priate.
I believe you the harbor
breakwater that it is adopted
would be an effectual stop to the
[illegible] the harbor from
[illegible] it appears [illegible]
