Dear Sir:-
Yours of the 5th reached
station 1795, making a progress
for the week of 235 stations. This
does not include at the total
work of the crews no we can
163 find the change of line to
avoid the shoulder at sta 1535
and on today we had to part
of 85 stations get around a
bluff at sta 1775 which was
not shown on the topographical
of the 400 ft. map. So the below
line runs by the Carter Furnace
for 483 stations. Up to Friday
morning the weather was
very severe, high winds, snow
every day and a temperature
under above 180 with 200 or more
