Dear Sir —

Saturday night the line reached Station 2040 making a mile for the week of 245 stations. Expecting a delay of about 2000 ft the extra time was spent in locating the hundred feet of which had a dense mud depth of twenty feet this and the 24th of such on the woods accounts for the slow progress. I have sent you in the past four days the pay roll & expense account with receipted bills under separate cover.

I will move the party to-day on Monday & take up the line on that vicinity.
