Dear Sir —

Your letter of the 4th received. I estimate that we have 14.9 miles to run on between Albany & Glens Falls and 211 between the end of our line and the east side of the Susquehanna River. After looking over the drafts and profiles which I have just received & believe we can obtain the River by the 21st. I am not sure if we can fill on the Pa. & Susquehanna gap on 10 days. The large percentage of the time no work could, of course, be done, & most of the work would be shortened on the gap by work running on the Albany & Selling the P.A.
