Pier Foot 12

March 27 4

F. A. Ondiette Chief Engr
35 Nassau St
New York

Dear Sir—

We started on the Column and of the line this morning & are expending tonight here. I hope arranged to spend tomorrow night at the Reddy Int Landing Landing, which Mr Fuller the R.R.R. engineer has placed at our disposal. Below there I have rapids at about 2 miles inter vals.

I getting some more part-letters tight as soon as the two ends of the line are tied together that I can hand the party. I will send my the pay roll or do to the Commissioners on the last day of the month.
