Dear Ned:

I send you the Centreville today in glass jar in box 5 lbs foot paste — Put on my mares feet outside (all over) and bottom fitting as much as possible into crevices around frog and over heels up to hair — For first week or ten days it would be best to put on 3 times a day until her feet are good and soft and lifely after which a couple of times a week will answer. A good way to handle this stuff is to put a small quantity in tomato can — of course shaking up well so as to get all thoroughly mixed. You will find this stuff will soften all superfluous callous sole which is better such than in next time shod. I think if you will keep her heels well down and toes trimmed out — she will have a good big soft wide frog that will keep her going no matter how
