P.S.—

Before sealing my letter it occurs to me to ask your advice about a filly I have, hoping my communication will not be long enough to worry you.

She is a yearling (last spring) by ~~Chester A~~ Harry Plummer 2976 a son of Harry Clay 45 & Harry Plummer is out of Nellie Plummer & is thus by brother to my mare I've written you about on the other sheet. The dam of my filly is one the handsomest mares I ever saw full 16 hands by Chester Chief a son of Ryedyk's Hambletonian 10. The filly is standard & registered. I bought her of a friend in New York at 4 months old for $150. She was put in a box & shipped down by Rail & was all the winter getting over the trip but is now handsome & growing nicely. Would you breed her with spring at two years or would you develop her at two & three years & then put her to breeding?

She trots fast across the grass fields. What do you think of her breeding? for a brood mare?

Yours truly

W. T. B.
