will cheerfully discharge him. I have made no mention & will make none in relation to the subject of your letter except to Mr Anderson; & to him I have said that your manner was kind & your reasons plausible. I feel so much interest in your colony even to inflict (intentionally) an injury upon it, and if you will always be as frank & kind in reminding me of it as you have been you will always meet a corresponding frankness. I hope you will always exercise the freedom of a Brother

very kind regards to your dear family

affectionately J H Wilson

The Capitol
Dear Sir I do not
some Friendly letter
with the Commodore
to a company of
it is very mortifying to my feelings
to be mortifying to my feelings
Charles Mutter was so
now in the affair. We will
inform you what part
take in the matter. Are
Yours &c B Latrobe Esq
Colonization Office
Baltimore

I appreciate your kind
for the future in my employ
shall ever take part in a
similar affair
Yours truly J H Wilson

(Mr Polk is dead)

I had the Pleasure of reading a report of Com. Nicholson late Commodore of the United States Potomac on the Coast of Africa which was very Pleasing and interesting. I met my approbation in Part I do not agree with the Commodore with regard to his remarks relative to the appointment of agents as he would recommend white men in our colonies we know that I know from experience that men of the Label here in Part are not so Submissive to Each other as they would from one so different but this has its original from Ignorance and Prejudice therefore I am much Holly convinced that it is easier at this present time to guide a few in to the white way than to go all until we have a large Population

Another Idea upon the Subject - he states that the Native must be more Submissive to a white agent this Grow out of different motives of the Natives this they have been taught. Some that the most part are from where we come and therefore they have made use of this in a more or less degree - the time must come when the must pass in to the hands of people of colour as already observed therefore I say now is the time Where there is suitable persons to be found make the Experiment I know coping the Bring Clean cannot without a Purge out at the degree of Prejudice which is generally embraced in the breast of the white man and cannot the coloured
