such books as I stand in need of can be procured and sent from Balto at a much cheaper rate than they could be purchased here they are not kept on hand at the only book store we have in this village consequently I should have to send to Boston or N York for them. Those Books that I require are "Mechlis Anatomy 3 vols" "Velpeaus Surgical Anatomy 2 vols" "Coopers first lines of Surgery 2 vols" "Wendells or Dewees Obstetrics" A Treatise on "Therapeutics & Materia Medica, The "Principals of Diagnosis" by Marshall Hall. Ainsworth Latin Dictionary & an English Dictionary. with any work on the Theory & Practice of Medicine you may think fit. I think a part of these might be found at second hand book stores others may be procured from the Library of some Physician who has no far the use for them.

I returned from Hanover with a determination to pay a somewhat closer application to my studies than I had previously done. I was quite intimate with most of the students became more or less acquainted with their several abilities and found myself terribly deficient in many respects, now I am anxious to attain the same standing when I meet them next year and altho the most of them are my seniors in study by a year, I may overtake them. I found that most of them had a slight knowledge of Latin which has brought me to the conclusion that I might attain the same. I have commenced it & do not find it to be quite as difficult as I imagined.

I shall be happy to hear from you as early as possible, and hope that I may ever deserve the patronage of your Worthy body

I remain Very Respy Yr obedt Servt.
