

has kept me posted in regard
to Willie's health, and I am
happy to learn my suppositions
in regard to his recovery are
fast becoming true. A
similar accident befell
me, when I was of his age
but as you see it did not do
me much harm. You will
have to be careful of him in
the warm weather, as any
effects of the sun &c. might
lead to fainting & spells.
I had them for some years.

My examinations are only
half over, I have had to
write steadily for five hours,
three days in succession
so you will excuse the
appearance of this scrawl.

Have you heard from
my folks lately. I had a
letter on Monday all

wish to be remembered.

Tell Nan, that Willie's photo-
graphs are finished, so
she can write up, after one
before they have all disap-
peared. Remember me & say
to your Father & Mother and
all at home; I trust Willie
may be much better, and
rapidly recover.

I must now
go to work again and begin
to "Bore" remaining as ever
Your true friend
Will. O'Peary
Aunt

P.S. Count. Du-B. came to my
room on Sunday, and such a
harangue, I never heard. He will
go crazy soon if he keeps on
in his present course.

Dr. O'P
